## Section 1 Overview of Trends in Recorded Crime

- Figure 1.1 Trends in recorded crime, 1970 to 2013/14
- Figure 1.2 Recorded crime by crime type, a comparison of 1998/99 and 2013/14
- Figure 1.3 Trends in recorded crime by crime type, 1998/99 to 2013/14
- Table 1.1 Recorded crime: numbers and rates per 1,000 population for violence against the person, theft (including burglary) and criminal damage, and vehicle offences, 1970 to 2013/14

## Section 2 Trends in Recorded Crime by Type of Crime

- Figure 2.1 Homicides by calendar year 1969 to 2013
- Figure 2.2 Violence with and without injury, 1998/99 to 2013/14
- Figure 2.3 Comparison of assault offences with and without injury, 2003/04 to 2013/14
- Figure 2.4 Number of business and personal robberies recorded, 1998/99 to 2013/14
- Figure 2.5 Trends in theft (including burglary), criminal damage and all other crime, 1998/99 to 2013/14
- Figure 2.6 Domestic and non-domestic burglaries, 1998/99 to 2013/14
- Figure 2.7 Comparison of theft offences, 1998/99 to 2013/14
- Figure 2.8 Criminal damage by type of damage, 2013/14
- Figure 2.9 Trafficking of drugs and possession of drug offences, 1998/99 to 2013/14
- Table 2.1 Rape and sexual assault/sexual activity offences: length of time between the date the offence occurred and the date the offence was reported, 1998/99 to 2013/14
- Table 2.2 Recorded crime by offence, 1998/99 to 2013/14
- Table 2.3 Homicides, 1969 to 2013
- Table 2.4 Homicides, 1998/99 to 2013/14

## Section 3 Knife and Sharp Instrument Crime

- Table 3.1 Selected violent and sexual offences recorded by the police involving knives or sharp instruments by crime type in Northern Ireland, 2007/08 to 2013/14
- Table 3.2 Proportion of selected violent and sexual offences recorded by the police involving knives or sharp instruments by crime type in Northern Ireland, 2007/08 to 2013/14

## Section 4 Victims of Crime

- Figure 4.1 Crimes recorded by type of victim, 2013/14
- Figure 4.2 Percentage of victims by age band in each main crime type, 2013/14
- Figure 4.3 Age profile of crime victims compared with Northern Ireland population profile, 2013/14
- Figure 4.4 Proportion of crime victims by age band for the main crime types, 2013/14
- Table 4.1 Percentage of each victim type recorded by type of crime, 2013/14

## Section 5 Outcomes

- Figure 5.1 Percentage point change in the main recorded crime type outcome rates, 2013/14 compared with 2012/13
- Figure 5.2 Outcome rates, 1998/99 to 2013/14
- Figure 5.3 Outcome rates by method of disposal, 1998/99 to 2013/14
- Table 5.1 Crime outcomes by crime type and method of disposal, 2013/14
- Table 5.2 Recorded crime outcome rates by offence, 2007/08 to 2013/14
- Table 5.3 Recorded crime outcomes and outcome rates by method of disposal, 1998/99 to 2013/14

## Section 6 Geographic Patterns of Crime

- Figure 6.1 Map of policing districts and policing areas in Northern Ireland
- Table 6.1 Recorded crime by policing district and policing area, 1998/99 to 2013/14
- Table 6.2 Outcome rates by policing district and policing area, 2007/08 to 2013/14
- Table 6.3 Recorded crime per 1,000 population by policing district and policing area, 1998/99 to 2013/14

## Introduction

### Strengths and Limitations of Police Recorded Crime Statistics and Alternative Measures of Crime

While this annual bulletin presents the level of crime recorded by the police, there is an alternative but complementary measure of crime, the Northern Ireland Crime Survey (NICS) which is published by the Department of Justice for Northern Ireland. Each source of crime information has different strengths and limitations but can be looked at together to provide a more comprehensive picture of crime than could be obtained from either series alone. Details around the need for both recorded crime figures and the NICS can be found in paragraphs 1.2 and 1.3 of the bulletin [Experience of Crime: Findings from the 2012/13 Northern Ireland Crime Survey](#). Both of these measures of crime inform public debate about crime and support the development and monitoring of policy.

Unlike the Northern Ireland Crime Survey, police recorded crime figures do not include crimes that have not been reported to the police or those that the police decide not to record, but they do cover crimes against those aged under 16, organisations such as businesses, and crimes 'against the state' i.e. with no immediate victim (e.g. possession of drugs). It was estimated in 2012/13 that around 52 per cent of NICS comparable crime was reported to the police in Northern Ireland although this varied for individual offence types.

Like any administrative data, police recorded crime statistics are affected by the rules governing the recording of data, systems in place and operational decisions in respect of the allocation of resources. More proactive policing in a given area could lead to an increase in crimes recorded without any real change in underlying crime trends. These issues need to be taken into account when using these data.

Recorded crime statistics are affected by changes in reporting and recording practices. To ensure consistency, police recording practice is governed by Home Office Counting Rules (HOCR) and the National Crime Recording Standard (NCRS). These rules provide a national standard for the recording and classifying of notifiable offences by police forces in England and Wales. Although the Police Service of Northern Ireland does not fall under the jurisdiction of the Home Office, the same recording practices are followed and applied within Northern Ireland. However differences in legislation between the two jurisdictions must be taken into account when making comparisons between police recorded crime statistics for England & Wales and those for Northern Ireland. Details of the relevant guidance are available through a [two-page NCRS fact sheet](#) and the [Home Office Counting Rules](#).

Further details on Police Recorded Crime statistics are available in the [User Guide to Police Recorded Crime Statistics in Northern Ireland](#), and in the [Police Recorded Crime Statistics Quality Report](#). These are reference guides with explanatory notes regarding the issues and classifications which are key to the production and presentation of police recorded crime statistics.

### Data Use

Recorded crime figures are an important indicator of police workload, and can be used for local crime pattern analysis and provide a good measure of trends in well-reported crimes (in particular, homicide, which is not covered by the NICS). There are also some categories of crime (such as drug possession offences) where the volume of offences recorded are heavily influenced by police activities and priorities; in such cases recorded crime figures may not provide an accurate picture of the true extent of criminality.

Recorded crime figures are used widely within PSNI as management information, to monitor performance on crime and detection rate targets against the Policing Plan, to inform PSNI policy and to provide information in support of operational research identifying appropriate allocation of police resource. The figures are also used by the Northern Ireland Policing Board and at local level by Policing and Community Safety Partnerships (PCSPs) to monitor the performance of the police. The Department of Justice for Northern Ireland is a key user of crime figures in relation to policy development.

Recorded crime figures are also used in response to both Assembly and Parliamentary questions, informing public debate and concerns around criminal activity. Information is used by academic researchers and the media, examining local and national public interest in current affairs relating to crime levels. There is a demand for crime figures from businesses, either keen to identify crimes that may affect their business or to identify demand for any related business service they may provide. Members of the public would also forward requests for crime information specific to their area of interest or specific to the area in which they live or work.

### Data Quality and Auditing

Each crime and outcome included within the police recorded crime statistics for Northern Ireland is individually checked for compliance with the [Home Office Counting Rules](#) and is subject to a validation and quality assurance process. These quality assurance processes have been set in place to ensure that the numbers and types of crimes being recorded are, as far as is possible, recorded in compliance with the Home Office Counting Rules. In addition to this, PSNI's Statistics Branch has carried out audits of incidents to identify those that do not

result in a crime being recorded, or where the crime is not recorded correctly. The resulting compliance gives an indication of how much crime might be missed from the crime figures.

PSNI's Statistics Branch conducted a data quality audit during December 2013 and January 2014, the main emphasis of this audit being to check that incidents where a crime should have been recorded did indeed contain a crime. Compliance in relation to this aspect of the audit was 93%. Other aspects of the audit included the accuracy of crime classification, whether or not the correct number of victims is being recorded and whether crimes are being recorded within 72 hours of initial report. The compliance rates for each aspect of the audit are shown in the table below.

<b>Audit December 2013 to January 2014</b>	<b>number</b>	<b>%</b>
Crime recording overall compliance (base = 1,327)	1,229	93%
Crime classified correctly (base = 1,229)	1,193	97%
Correct number of victims recorded (base = 1,229)	1,199	98%
Crime'd within 72 hours (base = 1,229)	898	73%

Further details of the data quality checks and processes that PSNI has in place are available in section 4 of the [User Guide to Police Recorded Crime Statistics in Northern Ireland](#).

While the UK Statistics Authority (UKSA) removed the National Statistics designation from the police recorded crime statistics in England & Wales in January 2014, the recorded crime statistics for Northern Ireland remain designated as National Statistics. In February 2014 UKSA approached PSNI seeking reassurance on the quality of the recorded crime statistics that are produced for Northern Ireland. A detailed account of the various quality assurance processes in place was provided and we are currently awaiting a decision from UKSA as to whether or not they intend to reassess these statistics in the near future.

#### **Data Availability**

Information that is published in the monthly and annual crime bulletins has been examined to make sure it meets levels of quality and completeness appropriate for publication. The proportion of records for which information is unavailable is identified in the bulletins and accompanying spreadsheets. There will be some variables held on the operational system for which the level of missing or incomplete information is too high to allow for inclusion in the bulletins, or where the data quality is not sufficient for publication.

Crime classifications are published at levels for which disclosure issues have been considered, including the geographic level at which the information is produced and also the length of time period covered. The [confidentiality protection arrangements](#) document on the PSNI internet site provides additional information on PSNI's arrangements for maintaining the confidentiality of statistical data and statistical disclosure control. Details on the availability of information relating to victim characteristics can be found in Section 4.5 of the [User Guide to Police Recorded Crime Statistics in Northern Ireland](#).

#### **Publication**

Annual data are published on a financial year basis (ie 1<sup>st</sup> April to 31<sup>st</sup> March), with the annual bulletin providing finalised figures for the latest financial year along with trends and commentary. This ties in with PSNI's statutory obligation to report on performance on a financial year basis.

Provisional recorded crime figures are published each month on a rolling 12 month basis and financial year to date basis. Provisional figures remain subject to change until the annual data are published. Provisional figures in each monthly bulletin supersede those published in previous monthly updates.

The publication date for the monthly bulletin covering the final crime figures for the latest financial year is pre-announced and can be found via the [UK National Statistics Publication Hub](#). This is also made available via a [publication schedule](#) on the PSNI Internet site, along with the publication date of each monthly update and annual trends bulletin.

The main tables in this bulletin are also available in [excel format](#).

The PSNI Internet site has a [crime statistics archive](#) containing information relating to crime figures dating back to 1968.

#### **Crime Statistics User Guide**

Further details on Police Recorded Crime statistics are available in the [User Guide to Police Recorded Crime Statistics in Northern Ireland](#). This is a reference guide with explanatory notes regarding the issues and

classifications which are key to the production and presentation of police recorded crime statistics. The guide provides background information on:

- definitions relating to crimes, incidents and detections, including a description of the crime types included within the crime bulletins;
- recording practices, including PSNI data collection, quality and audit processes;
- data timeliness and availability; and
- the geographic areas for which crimes are available (statistics for geographies other than policing area and policing district can be accessed through the [Northern Ireland Neighbourhood Information System \(NINIS\)](#)).

### User Feedback

We welcome comment and feedback on these statistics. If you would like to forward your views, receive notification of new publications or be kept informed of developments relating to PSNI statistics, please email your contact details using the email address provided below. [Comments and feedback](#) from users of the crime data are available on the PSNI Internet Site.

### Contact Details

For further information about the police recorded crime statistics for Northern Ireland, or to contact the PSNI Crime Statistician please:

Email: [statistics@psni.police.uk](mailto:statistics@psni.police.uk);

Write to: Statistics Branch, Lisnasharragh, 42 Montgomery Road, Belfast, BT6 9LD; or

Telephone: 028 9065 0222 ext 24135, Fax: 028 9092 2998

## Changes to crime classifications

On occasion, the structure of the classifications used to compile recorded crime may change.

**Alignment of PSNI classifications with England and Wales:** During 2010/11 an exercise was conducted to more closely align the crime recording classifications used in PSNI publications with those used for police recorded crime figures in England and Wales. The aim of this exercise was to improve comparability of police recorded crime figures in Northern Ireland with those for England and Wales, while taking into account legislative differences between the two jurisdictions. The realigned crime classification was introduced within PSNI in April 2011.

This exercise realigned the police recorded crime figures for each financial year dating back to 1998/99. Figures at the level of individual classifications differed slightly after reclassification to those figures published prior to reclassification. However the total recorded crime figure for each financial year 1998/99 onwards remained unchanged from the total figure originally published.

**Crime classifications consultation November 2011:** In November 2011 PSNI's Statistics Branch ran a consultation exercise about proposed changes to reduce the overall number of crime classifications. This was in line with a similar exercise conducted by the Home Office in England and Wales. This resulted in a reduction in the number of crime classifications from 148 to 126 and these changes which were introduced in April 2012.

**Crime classifications consultation December 2012:** The focus of the consultation launched in December 2012 concerned the presentation of police recorded crime under two broad categories – 'victim-based crime' and 'other crimes against society' in order to improve clarity of presentation. This consultation followed a similar exercise conducted by ONS in respect of police recorded crime in England and Wales. This resulted in a change to the previous classification system implemented from 1<sup>st</sup> April 2013. All police recorded crime figures published from June 2013 onwards are based on this revised classification.

Figures based on previous classifications are still available in the [Crime Statistics Archive](#) on the PSNI Internet site.

## Conventions used in figures and tables

While the detection rates are rounded to one decimal place, the detection rate change in % pts is calculated on the unrounded detection rates and then rounded to one decimal place.

'-' indicates that for offences recorded a percentage change is not reported because the base number of offences is less than 50, and that for offences detected a detection rate cannot be calculated as there were no offences recorded.

'..' indicates that data are not available.

# 1 Overview of Trends in Recorded Crime

**Background:** The police recorded crime figures presented in this bulletin provide a comprehensive data series of crimes recorded in line with the expanded offence coverage which came into effect with revised Home Office Counting Rules on 1<sup>st</sup> April 1998. During 1998/99 crime figures were collated using the rules which were in place previously, as well as by the revised rules. The revised rules added more than 32,000 crimes to the dataset, increasing the level of crime by 42% (from 76,644 to 109,053).

Since 1998/99 there have been changes to the way in which crimes have been captured on PSNI systems. Between 1998/99 and 2000/01 crimes were recorded through a paper-based system where a completed form was forwarded to the PSNI Statistics Branch for input onto a stand-alone computer system from which crime figures were then extracted.

In April 2001 PSNI introduced electronic crime recording through an integrated crime information system (ICIS), which resulted in more low level crime being captured than would have occurred through the previous crime recording process. The level of crime recorded in 2001/02 was 139,786. While the National Crime Recording Standard (NCRS) was implemented by the Home Office in April 2002, the introduction of ICIS in the previous financial year meant that PSNI had already experienced much of the increase in crime attributed to NCRS which was seen in police forces in England and Wales. In 2002/03 the level of crime was 142,496, an increase of 2 per cent on the previous year. The levels of crime experienced in 2001/02 and 2002/03 were the highest levels recorded within this data series.

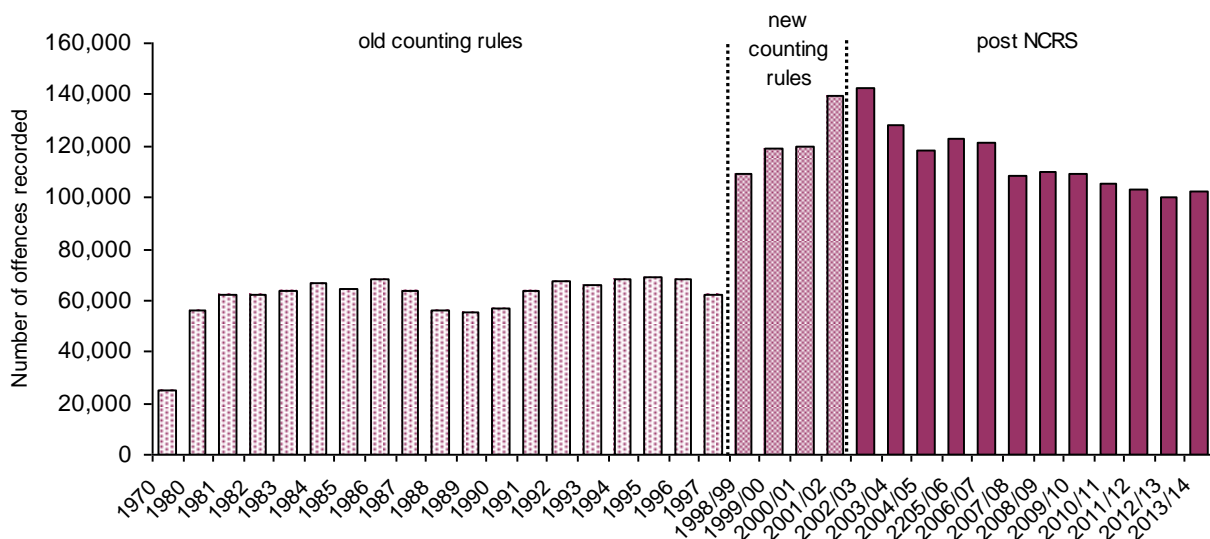

The current system which is used within PSNI to record crime is called NICHE and was introduced from 1<sup>st</sup> April 2007. Ensuring continuation of the crime recording process and data quality was an integral part of the development of this system. An audit was conducted a few months after the system commenced to establish if the crime recording process and data quality had been impacted in any way. The results of the audit indicated that the change to using the NICHE system for crime recording had no negative impact on the quality of recorded crime data.

There are a range of factors that can have an impact on the recorded crime data series. For example changes to existing legislation, the introduction of new legislation and clarifications or changes to the Home Office Counting Rules can all cause discontinuities to the data series. As far as possible these factors will be identified in the commentary or table footnotes within this bulletin.

## Overview of trends in recorded crime

Crime has shown a downwards trend over the last eleven years. It reached a peak of 142,496 in 2002/03 and has since fallen to 100,389 in 2012/13, the lowest level recorded since 1998/99 (the first year for which crime data comparable under the revised Home Office Counting Rules is available) Crime has since risen to 102,746 in 2013/14. While this shows an increase of 2.3 per cent on the previous year, the level recorded in 2013/14 is the second lowest crime figure recorded since 1998/99.

**Figure 1.1 Trends in recorded crime, 1970 to 2013/14**

In 1998/99 there were 65 crimes recorded per 1,000 population, rising to a peak of 84 crimes per 1,000 population in 2002/03. The latest figure for 2013/14 puts the crime rate at 56 per 1,000 population, the second lowest rate in the current data series, the lowest being 55 per 1,000 population in 2012/13.

The decrease in crime has mainly been experienced within the offence categories of theft (including burglary) and criminal damage, while offences of violence against the person and sexual offences have shown an upwards trend since 2000/01. As a result the profile of crime has changed in the years between 1998/99 and 2013/14. In 1998/99 violence against the person, sexual offences and robbery accounted for 20 per cent of all recorded crime, while theft (including burglary) and criminal damage accounted for 73 per cent. In 2013/14 theft (including burglary) and criminal damage represented 54 per cent of all recorded crime, with the proportion of violence against the person, sexual offences and robbery increasing to represent 35 per cent of all recorded crime.

**Figure 1.2 Recorded crime by crime type, a comparison of 1998/99 and 2013/14**

**Overview of trends in recorded crime by type of crime**

Figure 1.3 shows the trends for the main types of crime since 1998/99, reflecting both the decreasing levels of crime and also the changing profile of crime described previously.

**Figure 1.3 Trends in recorded crime by crime type, 1998/99 to 2013/14**

**Victim-based crimes:** In 2013/14 robbery, burglary and criminal damage fell to their lowest levels since 1998/99. Robbery and burglary levels have more than halved since they reached a peak in 2002/03, while the level of criminal damage in 2013/14 has fallen to half of that recorded in 2001/02 and has decreased year on year since 2006/07.

Within theft, vehicle offences were lower only in 2012/13 (when compared with 2013/14) and have fallen by 73 per cent when compared with the peak in 2002/03. All other theft offences (including theft from person, bicycle theft, shoplifting and other theft) reached a peak in 2001/02 before falling to the lowest level recorded in 2007/08. Since then there has been a general upwards trend with the number of such theft offences recorded in 2013/14 being the fifth highest.

Offences of violence against the person have shown an upwards trend since 2000/01. Levels reached 31,802 offences in 2006/07 before falling again in 2007/08. Figures remained fairly constant until 2013/14 which shows an increase of 6.9 per cent on 2012/13 and, at 32,403 offences, is the highest level recorded since 1998/99.

Sexual offences have shown an upwards trend since 2000/01. The figure for 2013/14 is the highest level recorded since 1998/99 and is nearly twice the level recorded in 2000/01.

**Other crimes against society:** Drug offences are at their highest level since 1998/99. The number of such offences has increased year on year since 2006/07. Offences of this nature can be influenced by police activities (see Section 2.1 of the [User Guide to Police Recorded Crime Statistics](#)), for example Operation Torus, a high profile operation specifically targeted at 'street level drug dealing' which started during 2012 continued during 2013/14.

Possession of weapons offences showed a generally upwards trend between 1998/99 and 2009/10. Since then levels fell year on year to 2012/13, although the levels recorded since 2010/11 are still higher than for any year prior to 2005/06. There was an increase of 76 offences between 2012/13 and 2013/14.

The trend for public order offences is only comparable from 2005/06, due to the introduction that year of offences relating to breaches of anti-social behaviour, non-molestation and sex offender orders. The level recorded in 2005/06 was 2,007 with the second highest level of 1,995 recorded in 2009/10. Since 2009/10 figures fell year on year to a level of 1,517 in 2012/13 before increasing by 19 to 1,536 in 2013/14.

The levels for miscellaneous crimes against society tend to fluctuate without showing any real trend. The figure of 2,415 for 2013/14 was 224 offences higher than for 2012/13 and the highest in the last four years.

**Other fraud:** In England & Wales offences such as fraud by false representation (deception) are reported to Action Fraud and from April 2013 these figures are no longer included in their police recorded crime statistics. However in Northern Ireland these offences are still reported to the police and so continue to be included in the PSNI recorded crime statistics. Other fraud showed an overall downwards trend between 1998/99 and 2007/08 and has been slightly upwards in direction since then.

### Overview of trends in recorded crime by policing area

Many policing areas have been showing falling crime trends over the last number of years, with Ards, Carrickfergus, Newtownabbey, Dungannon & South Tyrone, Omagh, Strabane and Coleraine showing their lowest crime levels since 1998/99.

Armagh and Limavady continue to show falling trends, although the level recorded in 2013/14 is not the lowest recorded in the data series.

A number of policing areas show trends which are generally downwards in nature but which have started to increase again in the last year or so: Castlereagh, Down, North Down, Lisburn, Banbridge, Newry & Mourne, Cookstown, Ballymena, Ballymoney, Larne and Moyle.

Fermanagh policing area recorded its highest crime level in 2011/12. The level for 2013/14 shows an increase on 2012/13.

Antrim policing area showed an upwards trend between 2008/09 and 2012/13, before showing a fall in 2013/14. Magherafelt showed a decrease in each of the last two financial years after year on year increases since 2008/09. Foyle showed little change between 2007/08 and 2010/11 and then experienced increased levels to 2012/13; the crime level for 2013/14 is lower than 2012/13.

Craigavon has shown a stable trend in recent years, with the level recorded in 2013/14 being the third lowest since 1998/99.

Crime levels Belfast have remained relatively stable in recent years; East Belfast is showing its highest level of crime in the last 10 years while South Belfast is showing its highest level of crime in the last seven years. Levels in North Belfast have not shown much change over the last ten years, although they have increased slightly in each of the last two years. In West Belfast crime levels have been fairly stable over the last five years, showing only a slight increase between 2012/13 and 2013/14.

### Overview of trends in outcome rates

Prior to April 2013 these figures were mainly presented in the form of sanction detections and sanction detection rates. These included the outcome methods of charge/summons, cautions (adult and juvenile), penalty notices for disorder and offences taken into consideration. The sanction detections and sanction detection rates did not include discretionary disposals or indictable only offences where no action was taken against the offender.

Since April 2013 the figures have been presented as outcomes, covering the methods of charge/summons, cautions (adult and juvenile), penalty notices for disorder, offences taken into consideration, discretionary disposals and indictable only offences where no action was taken against the offender. For this reason, most of the outcome figures in this bulletin are shown dating back to 2007/08 in order to provide a data series that is as comparable as possible, bearing in mind that discretionary disposals were first introduced as an outcome method during 2011/12 and penalty notices for disorder were introduced in June 2012.

The outcome rate rose each year from 2007/08 to 2012/13 when it reached 29.5%, before falling by 2.3 percentage points to 27.2% in 2013/14. PSNI introduced discretionary disposals during 2011/12; these contributed 2.9% to the outcome rate in 2011/12, 3.1% in 2012/13 and 2.6% in 2013/14. Penalty notices for disorder, introduced in June 2012, contributed 0.4% to the outcome rate in 2012/13 and 0.8% in 2013/14.

In 2013/14 each of the main crime types experienced outcome rates that were lower than for 2012/13.

The outcome rate for violence with injury increased year on year from 28.2% in 2007/08 and reached a peak of 37.0% in 2010/11, before falling each year to 32.9% in 2013/14. Violence without injury shows a similar trend, increasing year on year from 27.3% in 2007/08 to 40.7% in 2011/12 before falling each year to 29.4% in 2013/14.

The outcome rate for sexual offences rose each year from 17.5% in 2007/08 to 26.8% in 2011/12 before falling to 21.2% in 2012/13 and to 20.8% in 2013/14. The outcome rate for rape was at its lowest point in 2009/10 (12.8%) while its highest level was achieved during the previous twelve months (21.0% in 2008/09). At 16.5% the outcome rate for rape was slightly higher in 2013/14 than during 2012/13 when it was 15.0%. Other sexual offences reached their highest outcome rate of 30.5% in 2011/12, however this has since fallen to 23.5% in 2012/13 and again to 22.1% in 2013/14.

The 2013/14 outcome rates for possession of weapons offences and for public order offences were the lowest recorded in the comparable time period, while the 2013/14 outcome rates for burglary, robbery and drug offences were the second lowest since 2007/08.

**Table 1.1 Recorded crime: numbers and rates per 1,000 population for violence against the person, theft (including burglary) and criminal damage, and vehicle offences, 1970 to 2013/14**

Year	Total recorded violence against the person	Violence against the person offences per 1,000 population <sup>1</sup>	Total recorded theft (including burglary) and criminal damage	Theft (including burglary) and criminal damage per 1,000 population <sup>1</sup>	Total recorded vehicle offences <sup>2</sup>	Vehicle offences per 1,000 population <sup>1</sup>	Numbers and rates per 1,000 population	
							Total recorded offences	Total Offences per 1,000 population <sup>1</sup>
1970	737	0	20,830	14	2,467	2	24,810	16
1980	2,371	2	46,886	31	11,091	7	56,316	37

1. Population figures available from the Northern Ireland Statistics and Research Agency Internet site: <http://www.nisra.gov.uk/demography/default.asp3.htm>

2. Offences against vehicles includes theft or unauthorised taking of a motor vehicle, theft from a vehicle, interfering with a vehicle (from 1998/99 onwards under the revised counting rules), and aggravated vehicle taking (offence was introduced in Northern Ireland in 2004).

3. Change from calendar year to financial year.

4. The number of crimes recorded in that financial year using the coverage and rules in use until 31 March 1998.

5. The number of crimes recorded in that financial year using the expanded offence coverage and revised Counting Rules which came into effect on 1 April 1998.

6. The National Crime Recording Standard was introduced in April 2002, although some forces adopted NCRS practices before the standard was formally introduced. Figures before and after that date are not directly comparable. The introduction of NCRS led to a rise in recording in 2002/03 and, particularly for violent crime, in the following years as forces continued to improve compliance with the new standard. Much of the impact of introducing NCRS was experienced by PSNI in 2001/02, through the introduction of an integrated crime information system (ICIS) within PSNI which improved the capture of low level crimes.

Crime figures for England & Wales are available from the [Office for National Statistics](http://www.ons.gov.uk) Internet site. Further information and links to UK and International crime statistics can be found in Section 8 of the [User Guide to Police Recorded Crime Statistics in Northern Ireland](#).

## 2 Trends in Recorded Crime by Type of Crime

A description of each main crime type is provided in section 3 of the [User Guide to Police Recorded Crime Statistics in Northern Ireland](#). Appendix 1 of the user guide contains a list of all recorded crime classifications. The classification structure implemented from April 2013 presents recorded crime on the basis of victim-based crime and other crimes against society. Northern Ireland continues to record 'other fraud' offences, while in England and Wales the majority of these offences are now reported through Action Fraud.

### 2.1 Victim-based crime

These offences include violence against the person, sexual offences, robbery, theft offences (including burglary) and criminal damage offences.

#### 2.1.1 Violence against the person

Violence against the person includes a wide range of offences from murder to minor assaults such as pushing and shoving that result in no physical harm. Even within the same classification the degree of violence used can vary considerably between incidents.

The number of violence against the person offences showed a general upward trend from a level of 18,498 in 1998/99 to a level of 31,802 in 2006/07. Between 2007/08 and 2012/13 levels were close to 30,000 offences. The latest figure of 32,403 for 2013/14 show an increase of 6.9 per cent when compared to 2012/13 and is the highest level recorded since 1998/99. The largest percentage change between financial years was a 22.1 per cent increase in the number of offences recorded between 2000/01 and 2001/02, which coincided with the introduction of the ICIS crime recording system. As this system had improved processes for picking up and recording low level crimes, this may have some impact on the scale of this increase.

This classification is further split into homicide, violence with injury and violence without injury.

**Homicide:** Homicide comprises the offences of murder, manslaughter, corporate manslaughter and infanticide. Figures presented in table 2.3 show the number of homicides dating back to 1969 by calendar year, and by financial year from 1998/99 in table 2.4.

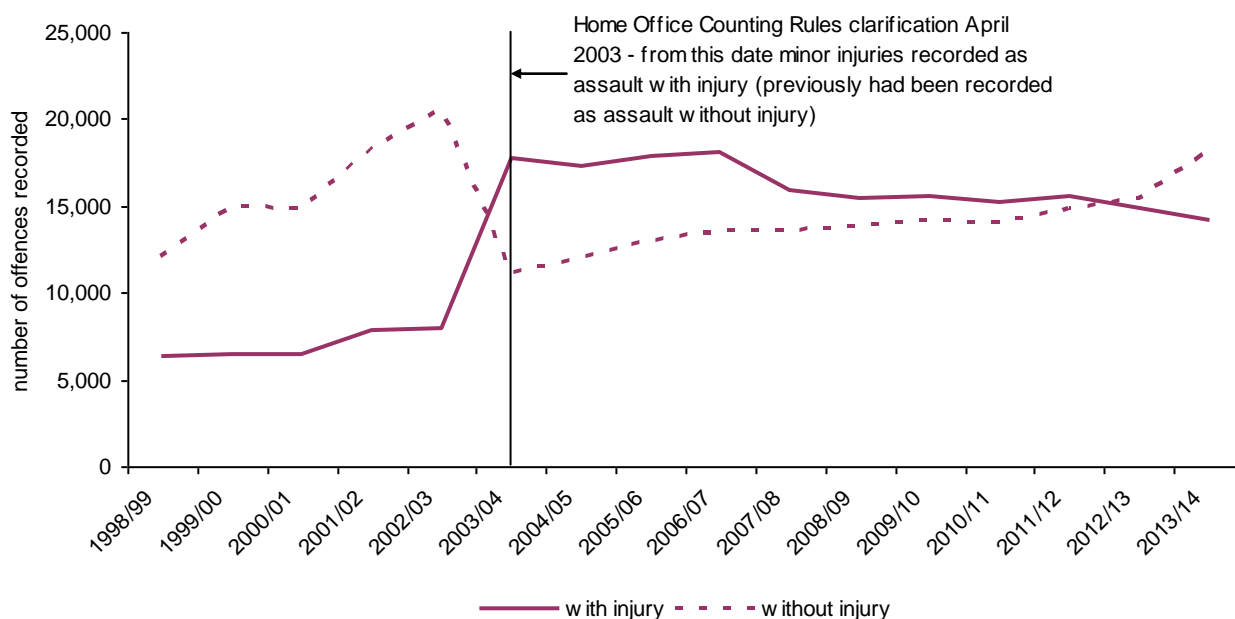

**Figure 2.1 Homicides by calendar year 1969 to 2013**

In the current data series from 1998/99, the number of murders recorded was at its lowest level in 2011/12 with 16 recorded. There were 17 offences of murder recorded during both 2012/13 and 2013/14. The figure for 1998/99 includes the 29 persons killed in the Omagh bomb which occurred on 15 August 1998.

**Comparability of trends in violence with and without injury:** The violence with and without injury classifications are only comparable from 2003/04 onwards due to the following Home Office Counting Rules clarification. Prior to April 2003, offences where the victim received minor injuries (e.g. bruising or minor abrasions) were recorded as assault without injury. Since April 2003, these offences have been recorded as assault occasioning actual bodily harm (AOABH). As can be seen in figure 2.2, the impact of this was a large increase in violence with injury, particularly the classification 8N Assault with injury which increased from 6,979 in 2002/03 to 17,056 in 2003/04. This also resulted in a corresponding decrease in violence without injury, particularly classification 105A Assault without injury which fell from a level of 16,105 in 2002/03 to 7,345 in 2003/04. However the overall trend for violence against the person was not impacted.

**Figure 2.2 Violence with and without injury, 1998/99 to 2013/14**

**Violence with injury:** As discussed above, changes to the recording of minor injuries means that this classification is only comparable from 2003/04 onwards. It reached a peak in 2006/07 with a total of 18,127 offences. The latest figure for 2013/14 (14,136 offences) is 4.8 per cent lower than 2012/13. It is the lowest level seen since 2003/04 and is 22.0 per cent lower than the peak reached in 2006/07. In 2013/14 offences within classification 8N Assault with injury represented more than 90 per cent of all violence with injury offences. Figure 2.3 illustrates the falling levels of assaults resulting in injury (classifications 5D and 8N) compared with the increasing trend in assaults with no injury (classifications 104 and 105A) since 2003/04.

**2 Attempted murder:** The number of attempted murders was at its lowest level in 1999/00 when 61 were recorded. The level rose each year to 235 in 2002/03, the highest level in the data series. There was a second peak of 172 recorded in 2005/06. Since then the number of attempted murders has remained at a level ranging from 104 in 2012/13 to 134 in 2007/08. There were 113 attempted murders recorded in 2013/14.

**Causing death or serious injury by driving (4.4 dangerous driving, 4.6 careless driving when under the influence of drink or drugs, 4.8 careless or inconsiderate driving, 4.9 unlicensed drivers):** When looking at these offences combined, there has been an increase in the number recorded over the last few years. They reached a level of 96 in 2009/10, which at that stage was the highest level recorded in the data series. Since then levels have generally increased to reach 126 recorded in 2013/14, 18 higher than 2012/13.

**5D Assault with intent to cause serious harm:** Increases in the number of offences within this classification from 2008/09 should be considered in the context of the following revised technical guidance which was issued by the Home office in April 2008. This guidance was issued to ensure that these offences were recorded in a consistent manner by all police forces. Clarification was provided to police forces on how to record offences of wounding with intent/GBH with intent for those assaults resulting in minor or no injury to a victim, but where the intent was to cause serious injury. The effect of this clarification was that some offences that would previously have been recorded as other types of assault are now recorded as GBH with intent. While the clarification was introduced in 2008/09, PSNI continued to experience the impact of this during 2009/10. The majority of police forces in England and Wales experienced similar increases in these offences as a result of this clarification. The level recorded for this crime type reached a peak of 1,266 in 2009/10 and has fluctuated since then, with 2013/14 showing a fall of 98 offences (to 1,031) when compared with 2012/13.

**8N Assault with injury:** These offences were at their highest level in 2006/07, reaching 17,416. Since then the series showed a downwards trend to 2010/11 before increasing again in 2011/12. Levels have fallen each year since 2011/12 to 12,809 recorded in 2013/14, 5.0 per cent lower than 2012/13 and the lowest level recorded since 2003/04. Within the classification of assault with injury, offences of grievous bodily harm and wounding have remained relatively consistent since 2001/02. With the exception of the highest levels of 935 and 901 experienced in 2008/09 and 2011/12 respectively, figures since 2001/02 have fluctuated between 689 recorded in 2005/06 and 814 recorded in 2009/10. Assault occasioning actual bodily harm (AOABH) was at its highest level in 2006/07 with 15,509 offences recorded. Since then there has been a downward trend with the lowest level since 2003/04 being recorded in 2013/14. The 2013/14 level is 4.0 per cent lower than 2012/13 and 27.5 per cent lower than the peak in 2006/07. Assault on police with injury was at its highest levels between 1999/00 and 2007/08, ranging from 987 in 2007/08 to 1,234 in 2002/03. Since 2008/09 levels have been slightly lower, ranging from 729 in 2011/12 to 976 in 2012/13. There were 769 offences in 2013/14.

**Violence without injury:** As with violence against the person with injury, this classification is comparable from 2003/04 onwards. Figures have shown a general upwards trend from this date. The latest figure for 2013/14 shows the highest level recorded since 2003/04 with 18,246 offences, an 18.2 per cent increase on 2012/13 and an increase of 63.4 per cent when compared with 2003/04. Figure 2.3 shows the changing profile of assault offences with and without injury since 2003/04.

**Assault without injury (104 Assault without injury on a constable and 105A Assault without injury):** Offences of assault on police without injury have mostly increased year on year from a total of 819 in 2003/04 to 2,568 in 2010/11. Levels have since fallen to 2,204 in 2013/14. Offences of assault without injury, comparable from 2003/04 only, showed a relatively flat trend between 2003/04 and 2010/11, with 2010/11 experiencing the lowest level in that time period with 7,024 offences recorded. The level has since risen each year to 10,771 recorded in 2013/14, the highest level experienced since 2003/04 and an increase of 18.6 per cent on 2012/13.

**Figure 2.3 Comparison of assault offences with and without injury, 2003/04 to 2013/14**

**3B Threats to kill:** These offences remain unaffected by the changes to the recording of minor injuries and so can be compared from 1998/99 onwards. Offences of threats to kill increased year on year from 409 offences in 1998/99 to a level of 2,323 recorded in 2010/11 before falling each year to 1,674 recorded during 2012/13. The level increased again by 12.5 per cent between 2012/13 and 2013/14 to 1,883 offences recorded.

**8L Harassment (including intimidation):** Looking at harassment offences only, these have shown a general upward trend from a level of 234 in 1998/99 to around 1,600 offences recorded in each of the four years between 2009/10 and 2012/13. Levels of harassment rose by 64.9 per cent between 2012/13 and 2013/14, from 1,608 to 2,651.

Intimidation is an offence in legislation in Northern Ireland but not within England and Wales and would be associated with the Northern Ireland security situation, involving offences such as intimidation-residence/occupation, person to leave employment or to do/refrain from doing any act. Intimidation offences reached levels of more than 1,000 in 2002/03, 2003/04 and 2005/06. However levels then dropped to 714 offences recorded in 2006/07 and since then the numbers have ranged from 358 offences recorded in 2012/13 to 461 recorded in 2007/08. There were 456 intimidation offences recorded in 2013/14.

**11A Cruelty to children/young persons:** The number of offences recorded generally fell between 1998/99, when 84 offences were recorded, and 2007/08 when there were 28 offences (except for a peak of 89 in 2003/04). Since then levels have risen year on year from 84 in 2008/09 to the current level of 184 recorded in 2013/14, an increase of 52 on 2012/13.

**13 Child abduction:** These offences have shown lower levels in more recent years. There were peaks of 76 recorded in 2001/02 and 79 in 2006/07. Since 2008/09 levels have ranged from 24 recorded in 2010/11 to 43 in 2012/13. There were 40 offences of child abduction recorded in 2013/14.

### 2.1.2 Sexual offences

The Sexual Offences (Northern Ireland) Order 2008 was introduced in February 2009 and has altered the definition and coverage of sexual offences. While this has had an impact on the provision of comparable data series for sexual offences, the new legislation has brought the recording of sexual offences in Northern Ireland more into line with the legislation and recording of these offences in England and Wales.

Under the Home Office Counting Rules, offences which were reported to the police between February 2009 (implementation date of the new legislation) and March 2010 but which were committed prior to February 2009 were recorded under the previous legislation wherever possible. However in April 2010 this guidance was changed so that historic allegations committed under the previous legislation should be recorded and detected as if committed today. Interpretation of the sexual offence data series should be considered in the context of these changes.

Sexual offences have shown a general upward trend from a low of 1,167 recorded in 2000/01 to a high of 2,234 recorded in 2013/14. The number of sexual offences recorded in 2013/14 shows a 15.6 per cent increase when compared with 2012/13 and is nearly twice the level recorded in 2000/01. The classification of sexual offences is split into rape and other sexual offences.

**Rape offences:** In Northern Ireland prior to 2003/04 the offence of rape could only be committed against a female. However the Criminal Justice (Northern Ireland) Order 2003 redefined the offence so that buggery without consent would constitute an offence of rape, in other words rape could be committed against a male. The number of rapes recorded reached its highest level in 2011/12 with 553 offences recorded. The level of 550 recorded in 2013/14 shows a reduction of 3 when compared with this highest level in 2011/12.

**Other sexual offences:** This includes offences of sexual assault and sexual activity, along with offences such as trafficking for sexual exploitation, sexual grooming and exposure / voyeurism.

**Indecent /sexual assault offences:** Prior to the introduction of the new legislation in February 2009, offences of indecent assault were split into offences against males and females and also by age 17+ and under 17. Under the new legislation this breakdown changed to males and females aged 13+ and under 13. Offences of indecent assault and sexual assault did not show any overall upwards or downwards trend over the time period 1998/99 to 2012/13. However the number of indecent/sexual assaults rose from 884 in 2012/13 to 1,032 in 2013/14, an increase of 148 offences and the highest level recorded since 1998/99. Looking at all indecent/sexual assaults with female victims, the lowest number of offences recorded was in 2000/01 with a level of 508, while the highest level was 778 recorded in 2013/14 85 higher than the second highest level recorded in 1998/99 and an increase of 118 on 2012/13. For indecent/sexual assaults with male victims the lowest level of 89 offences was recorded in 2001/02, with the highest level recorded during 2013/14 (254 offences). The figure for 2013/14 showed an increase of 30 offences when compared with the previous twelve months.

**Sexual activity:** Offences of unlawful sexual intercourse with a girl under 14 or under 17 were in place prior to the introduction of the new legislation in February 2009. The offences now in place are sexual activity involving a child under 13 or under 16 and causing sexual activity without consent. Sexual activity offences have generally increased from a low of 42 in 2001/02 to the 2013/14 level of 340. The largest changes in the time series were an increase of 94 offences between 2007/08 and 2008/09 and an increase of 83 offences between 2012/13 and 2013/14.

**Exposure and voyeurism:** These offences showed a general increase between 1998/99 and the peak in 2004/05 when 405 offences were recorded. The increase from 135 exposure offences in 2000/01 to 333 offences recorded in 2001/02 may have been in part impacted by the introduction of the ICIS crime recording system, for reasons previously outlined. While the trend since 2004/05 has been generally downwards there have been increases each year since 2011/12, when 234 offences were recorded, to the current level of 280 offences.

Many of the classifications included within other sexual offences ceased to apply with the introduction of the new sexual offence legislation. Those classifications not specifically mentioned above tend to have very low levels of offences recorded.

**Reporting of historic abuse:** Crimes are recorded based on the date the crime was reported to the police, rather than the date on which the offence occurred. For the majority of crimes, the reported date and the occurrence date are the same. However sexual offences are the main crime type where there can be a large gap between the date the offence occurred and the date the offence was then reported to the police. Table 2.1 illustrates this point for offences of rape and sexual assault / sexual activity.

**Table 2.1 Rape and sexual assault/sexual activity offences: length of time between the date the offence occurred and the date the offence was reported, 1998/99 to 2013/14**

	Percentages					
	Rape Offences			Sexual assault / sexual activity offences		
	Occurred and reported in same financial year (%)	Occurred up to 12 months prior to report date (%)	Occurred more than 12 months prior to report date (%)	Occurred and reported in same financial year (%)	Occurred up to 12 months prior to report date (%)	Occurred more than 12 months prior to report date (%)
1998/99	68	1	30	54	8	36
1999/00	66	5	28	57	9	33
2000/01	76	3	20	62	6	32
2001/02	73	2	26	68	3	29
2002/03	72	4	25	67	4	29
2003/04	72	4	24	71	6	24
2004/05	70	4	26	71	3	26
2005/06	75	3	22	69	3	27
2006/07	70	2	27	73	4	22
2007/08	80	1	19	81	2	17
2008/09	68	3	29	75	3	22
2009/10	64	4	33	68	3	29
2010/11	60	3	36	69	2	29
2011/12	61	6	33	72	4	24
2012/13	55	5	40	65	6	30
2013/14	49	5	46	59	4	37

The figures in table 2.1 provide an indication of the delay in reporting rape and sexual assault/sexual activity offences. These figures are dependent on the accuracy of the date on which the offence occurred and, in many cases, this will have been so long prior to reporting the offence that the exact date cannot be remembered and in these cases an approximate year may be the best information able to be provided.

An examination of each financial year between 1998/99 and 2012/13 shows that in up to 24 per cent of rape and sexual assault/sexual activity offences there may be a gap of more than 7 years between the offence occurring and the offence being reported to police; in 2013/14 this rises to 29 per cent.

When comparing 2012/13 with 2013/14 there has been an increase in the proportion of rape and sexual assaults that have been reported more than twelve months after the offence occurred. In 2013/14 there were 9 per cent of offences reported between one and five years after the offence occurred, compared with 7 per cent in 2012/13. Looking at offences where the gap was between six and ten years the proportions were very similar with 5 per cent in 2012/13 compared with 4 per cent in 2013/14. The percentage where the gap between the offence occurring and being reported was eleven or more years for 2012/13 was 21 per cent, compared with 27 per cent in 2013/14. The focus on cases of historic sexual abuse in the media and the Inquiry into Historical Institutional Abuse in Northern Ireland between 1922 and 1995 may have had an impact on increasing the number of historic sexual offences recorded.

### 2.1.3 Robbery

Robbery offences are split into those offences where the property stolen is business property and those where personal property is stolen. Robbery figures are also available according to whether the robbery was armed (i.e. involving a weapon of any type), those where a weapon was not involved and those robberies where a vehicle was hijacked.

The number of robbery offences rose each year between 1999/00 and 2002/03, from 1,383 to 2,497 before showing a general downward trend. At 958, the level recorded in 2013/14 is the lowest since 1998/99. This represents a fall of 56 when compared with 2012/13 and is 1,539 (61.6 per cent) lower than the peak of 2,497 recorded in 2002/03.

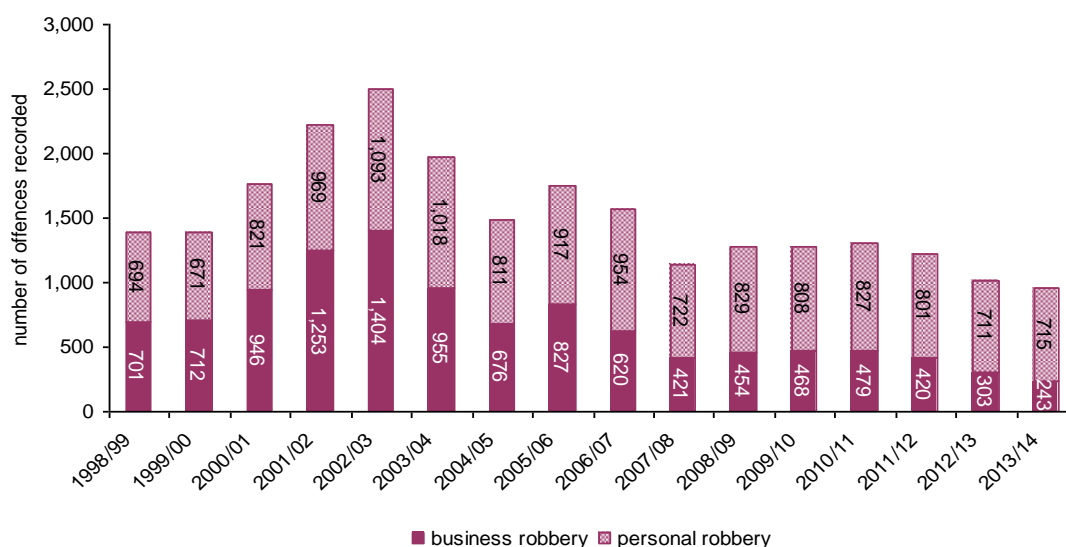

Between 1998/99 and 2002/03, when robbery reached its peak of 2,497 offences recorded, business robbery represented more than 50% of all robberies. However since 2003/04 this proportion has fallen and in 2013/14 business robbery represented a quarter of all robberies.

**Robbery of business property:** Armed business robbery accounts for at least 60 per cent of all business robbery. In 2004/05 this reached a proportion of 82 per cent, while the latest figure represents 70 per cent. Armed business robbery increased each year between 1998/99 and 2002/03 when it reached a peak of 1,068 offences. The trend has been downwards since then; at 169, the number of armed business robbery offences in 2013/14 is currently the lowest level recorded.

**Robbery of personal property:** Ordinary robbery accounts for around half of all personal robbery; in 2013/14 ordinary robbery represented 58 per cent of all personal robbery. The overall number of personal robbery offences was highest in 2002/03 when it reached 1,093 offences. Between 2008/09 and 2011/12 the number of personal robbery offences remained at a level of just over 800. In 2012/13 the number fell to 711, the third lowest level recorded since 1998/99; the level recorded in 2013/14 was very similar at 715 offences.

**Figure 2.4 Number of business and personal robberies recorded, 1998/99 to 2013/14**

**Hijacking offences:** These offences are included in the figures for robbery of business and personal property but are more specifically linked to a robbery where a vehicle has been taken. The highest number of hijacking offences was in 2005/06 with 290 recorded (representing 16.6 per cent of all robberies). Since then the number has ranged between 92 recorded in 2007/08 and 181 recorded in 2011/12. There were 102 hijacking offences recorded during 2013/14 (representing 10.6 per cent of all robberies recorded), the second lowest level since the peak in 2005/06. The majority of hijacking offences fall within robbery of personal property; in 2013/14, 96 of the 102 hijacking offences recorded fell within robbery of personal property.

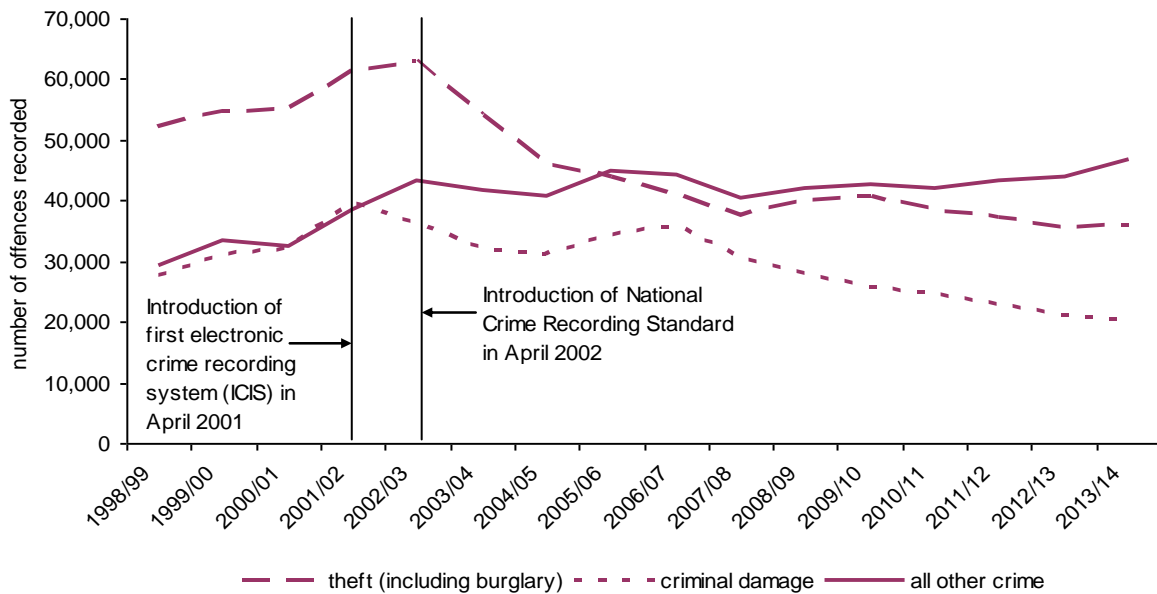

### 2.1.4 Theft offences (including burglary) and criminal damage

Theft offences include domestic and non-domestic burglary, vehicle offences, theft from the person, bicycle theft, shoplifting and all other theft offences. Criminal damage includes arson offences.

Theft offences (including burglary) rose each year between 1998/99 and 2002/03 to reach a peak of 63,053 and in 2002/03 accounted for 44 per cent of all recorded crime. Since then the level of these offences has shown a downward trend. While the 2012/13 figure of 35,611 was the lowest level recorded since 1998/99, the 2013/14 level of 36,023 is the second lowest, representing 35 per cent of all recorded crime and an increase of 1.2 per cent on 2012/13.

Criminal damage offences reached a peak of 39,748 offences recorded in 2001/12 before showing a general downwards trend, with the exception of increases between 2004/05 and 2006/07. There were 19,889 criminal damage offences recorded during 2013/14, the lowest level recorded since 1998/99. At its peak in 2001/02 criminal damage accounted for 28 per cent of all recorded crime, in 2013/14 this figure has fallen to 19 per cent.

**Figure 2.5 Trends in theft (including burglary), criminal damage and all other crime, 1998/99 to 2013/14**

**Burglary:** The number of burglaries recorded was at its highest in 2002/03 when 18,531 offences were recorded. The lowest level of recorded burglaries since the start of the data series was experienced in 2013/14 with 9,067 recorded, a 5.4 per cent reduction on 2012/13. The number of burglaries recorded has fallen year on year since 2009/10. In 1998/99 and 1999/00 the number of burglaries was reasonably evenly split between those which were domestic and those which were non-domestic. In more recent year the proportion of burglaries that are domestic has been closer to 60 per cent and, in 2013/14, 63 per cent of all burglaries were domestic.

**Domestic burglary:** These offences showed an upwards trend between 1998/99 and 2002/03 when a level of 10,122 offences were recorded. Between 2002/03 and 2004/05 the number of domestic burglaries fell by 2,820 (27.9 per cent). Since 2008/09 the number of domestic burglaries recorded has fallen year on year from 7,350 to 5,753 in 2013/14, currently the lowest level recorded since 1998/99 and 43.2 per cent lower than the level recorded in 2002/03.

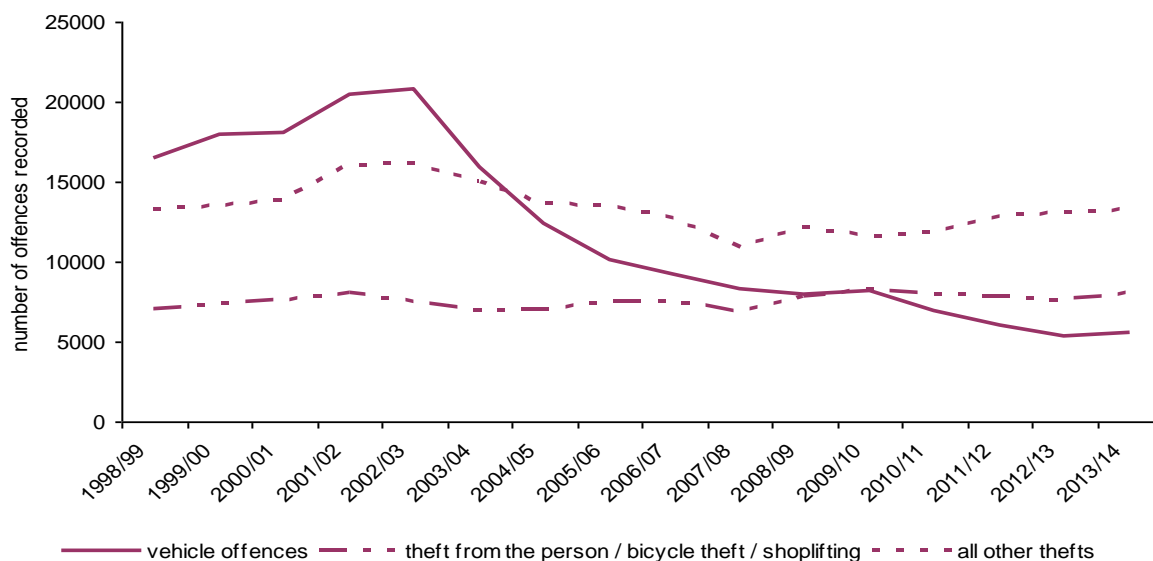

**Non-domestic burglary:** Since 2000/01 these offences have followed a similar trend to domestic burglary, albeit at a lower level. The highest figure was recorded in 2002/03 (8,409 offences), while the lowest level was achieved in 2013/14 (3,314 offences), an 8.9 per cent decrease on 2012/13 and a fall of 60.6 per cent when compared with 2002/03. Levels have fallen year on year since 2009/10.

**Figure 2.6 Domestic and non-domestic burglaries, 1998/99 to 2013/14**

**Theft offences (excluding burglary):** These offences showed a general increase between 1998/99 and 2001/02 reaching a level of 44,555, followed by a small decrease in 2002/03 with 44,522 offences recorded. Between 2002/03 and 2007/08 theft offences fell year on year before increasing again to 2009/10. In the last four years levels have remained similar, varying by 926 offences. There were 26,956 theft offences recorded in 2013/14, the fifth lowest level since 1998/99 and a 3.6 per cent increase on the level recorded in 2012/13.

**Figure 2.7 Comparison of theft offences, 1998/99 to 2013/14**

**Offences against vehicles:** From 1st April 2002, a clarification to the Home Office Counting Rules meant that most attempted thefts/unauthorised taking of motor vehicles previously recorded in theft or unauthorised taking of a motor vehicle were to be recorded as vehicle interference. This resulted in a decrease of 3,225 or 27.7 per cent in the number of offences of theft or unauthorised taking of a motor vehicle between 2001/02 and 2002/03, with a corresponding rise of 3,071 or 137.8 per cent in offences of interfering with a motor vehicle. Offences against vehicles showed large falls from 2002/03, decreasing year on year with the exception of a 4.0 per cent increase between 2008/09 and 2009/10. At 5,609, the total for 2013/14 is the second lowest level recorded showing an increase of 270 offences (5.1 per cent) on 2012/13.

In 2002/03, when the Home Office clarification described above was introduced, theft or unauthorised taking of a vehicle represented 40 per cent of all offences against vehicles, while theft from a vehicle represented 34 per cent. These proportions have since reversed, with theft or unauthorised taking of a vehicle representing 35 per cent and theft from a vehicle 55 per cent of all offences against vehicles in 2013/14.

**Theft from the person:** Offences of theft from the person jumped from 362 offences recorded in 2000/01 to 1,534 recorded in 2001/02. Much of this increase may be due to the introduction of the ICIS crime recording system and its improved capture of low level crime. Since a peak of 1,624 in 2002/03 these offences showed a downward trend with the level falling to 530 offences recorded in 2010/11. Levels then increased to 661 recorded in 2012/13 before falling again to 576 in 2013/14.

**Bicycle theft:** The trend for offences involving theft of a pedal cycle has remained relatively constant, with a high of 1,223 recorded in 1999/00 and a low of 816 recorded in 2002/03. Levels increased year on year since 2009/10 when 983 offences were recorded. The figure of 1,097 recorded in 2013/14 shows an increase of 24 (2.2 per cent) on 2012/13 and is the fourth highest level recorded since 1998/99.

**Shoplifting:** Shoplifting offences have also remained relatively constant. There was a general upward trend between 2003/04 and 2009/10 when the highest level of shoplifting was experienced, with 6,754 offences recorded. Levels then fell each year to 2012/13 before increasing again in 2013/14. The level of 6,372 in 2013/14 is the second highest recorded since 1998/99 and shows an increase of 8.2 per cent on 2012/13.

**All other theft offences:** These offences reached a peak in 2002/03 with 16,157 recorded, while the lowest level was experienced in 2007/08 with 10,898 offences recorded. Since then these offences have shown an increasing trend, with levels increasing year on year since 2009/10. The total for 2013/14 of 13,302 shows an increase of 1.8 per cent when compared with 2012/13.

Offences recorded in classification 49 Other Theft account for at least 71 per cent of all other theft offences, in 2013/14 this figure was 84 per cent. The trend for these offences was in an overall downwards direction between 2002/03 when 11,893 offences were recorded and 2007/08 when there were 8,316 offences. Since

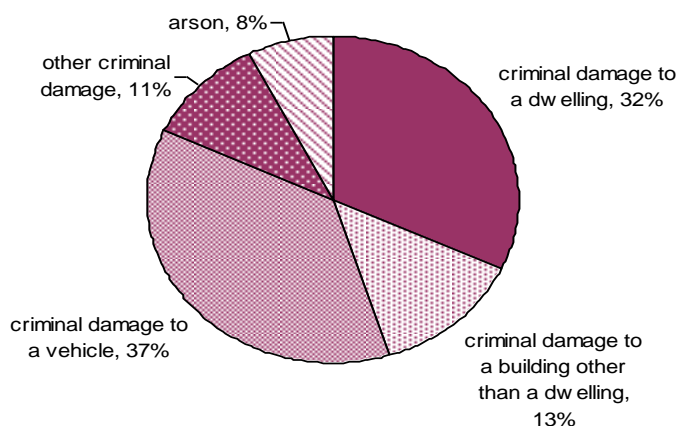

then there has been an upwards trend, with a current level of 11,217 recorded in 2013/14 showing an increase of 3.2 per cent when compared with 2012/13.

The change in classifications implemented from April 2013 saw offences of making off without payment move into the all other theft offences classification. These offences reached a peak of 3,081 in 2001/02 and have since shown a general downwards trend, falling to the lowest level of 957 offences recorded in 2013/14. The introduction of schemes such as Forecourt Watch may have had an impact on the number of offences of this nature recorded (information on this scheme can be found on the British Oil Security Syndicate Internet site <http://www.bossuk.org/forecourt-watch/>).

While the levels are low in comparison to most theft offences, dishonest use of electricity has seen a year on year increase from 8 offences recorded in 2007/08 to 159 offences recorded in 2012/13, before falling by one to 158 offences recorded in 2013/14.

**Criminal damage offences:** Criminal damage offences increased each year between 1998/99 and 2001/02 to reach a level of 39,748 offences recorded. There was an increase of 7,558 offences recorded (23.5 per cent) between 2000/01 and 2001/02 which may in part be due to the introduction of the ICIS crime recording system and its improved capture of low level crime. The criminal damage trend showed a second peak in 2006/07 with 35,827 offences recorded, however since then levels have fallen year on year. There were 19,889 offences recorded in 2013/14, the lowest level recorded in this data series and 5.1 per cent lower than 2012/13.

**Figure 2.8 Criminal damage by type of damage, 2013/14**

**Arson/arson endangering life:** The number of arson offences recorded increased each year between 1998/99 and 2001/02 when the level reached 2,924. Levels then fell to 2004/05, increased again to 2006/07 and since then have fallen year on year. At 1,496, the number of offences recorded in 2013/14 is the lowest recorded since 1998/99 and is two offences lower than 2012/13. Prior to the introduction of ICIS in 2001/02, there were very few offences of arson endangering life recorded. This may have been affected by the process of classifying offences which then improved with the ICIS crime recording system.

**Criminal damage to a dwelling:** Levels increased between 1998/99 and 2001/02, reaching a peak of 12,224 offences recorded. The level then fell to 2004/05 before increasing again to 2006/07. Since then the number of offences recorded has decreased year on year, with the 6,366 offences in 2013/14 representing the lowest level recorded.

**Criminal damage to a building other than a dwelling:** Levels increased to a peak of 6,820 in 2001/02. Between 2003/04 and 2006/07 levels remained reasonably constant at below 5,300. There was a downwards trend to 2011/12 when 2,490 offences were recorded, the lowest level since 1998/99. The level increased by 235 between 2011/12 and 2012/13 and fell again by 140 in 2013/14.

**Criminal damage to a vehicle:** These offences show the same trend as for criminal damage to a dwelling. The highest level recorded was 14,055 in 2001/02. Levels have fallen year on year since 2006/07 with 7,339 offences in 2013/14, the lowest number recorded and a fall of 10.1 per cent on 2012/13.

**Other criminal damage:** These offences showed a general increase between 1998/99, when 2,339 offences were recorded, and 2006/07 (4,033 offences recorded). Between 2007/08 and 2011/12 the number of offences fell from 3,402 to 3,002, a decrease of 11.8 per cent. Between 2011/12 and 2012/13 the number of offences fell by 36.0 per cent to a level of 1,922 which is the lowest level recorded. The level has since increased to 2,103, a rise of 9.4 per cent.

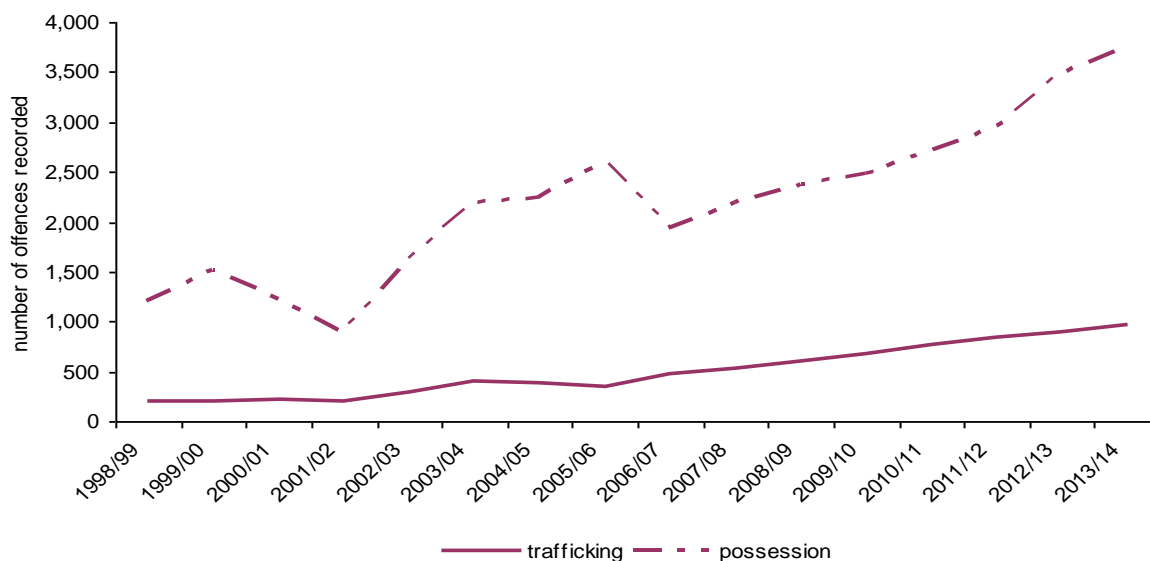

## 2.2 Other crimes against society

These offences include drug offences, possession of weapons offences, public order offences and miscellaneous crimes against society.

### 2.2.1 Drug offences

The recording of drug offences by police is particularly dependent on police activities and priorities (see Section 2.1 of the [User Guide to Police Recorded Crime Statistics in Northern Ireland](#)), for example the PSNI ran a high profile operation specifically targeted at 'street level drug dealing' which started during 2012 and continued during 2013/14 (Operation Torus). Since 1998/99 there has been a general upwards trend in the number of drug offences recorded. The lowest level recorded was in 2001/02 when there were 1,108 offences. Figures have increased year on year since 2006/07 and the latest figure for 2013/14 is 4,732, an increase of 8.1 per cent when compared with 2012/13 and the highest level recorded in the data series.

**Figure 2.9 Trafficking of drugs and possession of drug offences, 1998/99 to 2013/14**

**Trafficking of drugs:** In 1998/99 these offences accounted for 14 per cent of all drug offences; in 2013/14 they accounted for 20 per cent. The trend has shown a year on year increase since 2005/06 and, at 968, the 2013/14 figure is the highest recorded since 1998/99 and is 8.8 per cent higher than 2012/13.

**Possession of drugs:** Cannabis was reclassified from a Class B to a Class C drug in January 2004 and was subsequently reclassified back to a Class B drug in January 2009. From 2004/05 additional information on drug type was collated enabling drug possession offences to be split into possession of cannabis and possession of other controlled drugs. In 2004/05 possession of cannabis accounted for 81 per cent of all drug possession offences. This proportion has since decreased and in 2013/14 cannabis possession now accounts for just over two thirds of all possession offences. Since 2004/05 possession of other controlled drugs has increased year on year to a level of 1,177 in 2013/14, while possession of cannabis has increased year on year since 2006/07 to a level of 2,571 in 2013/14, the highest recorded.

### 2.2.2 Possession of weapons offences

The change in classifications implemented from April 2013 sees this grouping of offences introduced for the first time. The majority of these offences were previously included within violence against the person. These offences showed a general upwards trend between 1998/99 and 2009/10, when the level peaked at 804 offences recorded. Levels then fell each year to 2012/13 when 651 offences were recorded. There were 727 possession of weapons offences recorded in 2013/14, an increase of 11.7 per cent when compared with 2012/13.

### 2.2.3 Public order offences

This classification, which contains violent disorder and other offences against the state and public order, was also introduced through the revised classifications implemented in April 2013. Offences were previously included in other miscellaneous offences. Other offences against the state and public order include offences such as breaches of orders, bomb hoax related offences and offences under anti-terrorist legislation. In 2005/06 offences relating to breaches of anti-social behaviour orders, non-molestation orders and sex offender orders were added to the data series, resulting in an additional 1,400 offences being recorded in that financial year. Levels for other offences against the state and public order have fallen since the 1,908 offences recorded in 2005/06 with 1,469 offences recorded in 2013/14, an increase of 71 offences on 2012/13.

Bomb hoax related offences peaked in 2002/03 with 927 offences recorded. The second highest level recorded was in the following year with 582 offences, a fall of 345 (37.2 per cent) on 2002/03. The latest figure for 2013/14 is 202 offences, an increase of 11 when compared with 2012/13.

Violent disorder offences also peaked in 2002/03 with 246 offences recorded, before falling to 64 offences recorded in 2003/04. Levels then showed a general increase to 164 offences recorded in 2009/10, and have since fallen. There were 67 such offences recorded in 2013/14, 52 lower than 2012/13.

#### 2.2.4 Miscellaneous crimes against society

There is a wide range of offence types included within this classification, such as dangerous driving, forgery offences, handling stolen goods, going equipped for stealing, threat or possession with intent to commit criminal damage, perverting the course of justice and obscene publications/protected sexual material.

**Dangerous driving:** This is currently the largest category within miscellaneous crimes against society. There was a general upwards trend in the number of dangerous driving offences recorded between 148 offences recorded in 1998/99 and 865 recorded in 2009/10. Figures have remained similar over the last four years with 699 recorded in 2010/11, 701 in 2011/12 and 674 in both 2012/13 and 2013/14. Although the general rule for recording a crime is to do so on report of the crime [on the balance of probability that a crime has occurred], dangerous driving offences are only recorded when investigation confirms that the offence is made out. Improved processes for capturing police charges and recommendations made by the Public Prosecution Service may have contributed to the increases experienced prior to 2010/11.

**Threat or possession with intent to commit criminal damage:** Although the majority of offences classified to other crimes against society have no person or business victim, 98 per cent of offences of threat or possession with intent to commit criminal damage are recorded with businesses or individuals as the victim. These offences showed a general increase from 1998/99 to reach a peak of 583 offences in 2009/10. Levels then fell each year to 405 offences recorded in 2012/13 before increasing again to a level of 453 in 2013/14.

**Perverting the course of justice:** These offences showed a general upwards trend from a level of 23 offences recorded in 1998/99 to 258 in 2009/10. The largest single increase was from 144 offences in 2007/08 to 231 offences in 2008/09. Since then the number of offences recorded each year has remained relatively constant with 257 offences recorded in 2013/14, the second highest level in the data series.

**Obscene publications and protected sexual material:** The number of offences recorded between 1998/99 and 2010/11 showed a general upwards trend and ranged from 11 recorded in 1999/00 and 2000/01 to 62 recorded in 2006/07 and 2009/10. Since 2010/11 levels have risen year on year from 59 to 143 recorded in 2013/14. The level recorded during 2013/14 is the highest in the data series and represents an increase of 19 offences when compared with 2012/13.

### 2.3 Other fraud

From April 2013 the responsibility for recording the majority of fraud offences was transferred from police forces in England & Wales to Action Fraud. Offences previously recorded within the fraud and forgery classification and which continue to be recorded by all police forces are:

- Making off without payment – now included in the ‘all other theft’ classification;
- Possession of items for use in fraud, other forgery, possession of false documents and fraud/forgery etc associated with vehicle or driver records – now included in miscellaneous crimes against society.

However in Northern Ireland reports of fraud continue to be recorded by PSNI, as responsibility for dealing with these offences has not been transferred to Action Fraud. Therefore offences of fraud by Company Director, Sole Trader etc, false accounting, other fraud (not covered elsewhere including deception), fraud by failing to disclose information and bankruptcy and insolvency offences continue to be included in the PSNI recorded crime figures, in the classification ‘other fraud’.

The recording of fraud and forgery offences has been impacted by a change to offences of fraud by false representation, where counting changed from a ‘per fraudulent transaction’ to a ‘per account basis’ from January 2007. There were also some new offences introduced under the Fraud Act 2006 which came into force in January 2007. However it is known that incidents of fraud are under-reported to the police and this should be considered when interpreting this data series.

There were 4,406 offences of other fraud recorded in 1998/99, increasing to the highest recorded level of 4,902 in 1999/00. Numbers then generally fell to 2007/08 when 978 offences were recorded. Since then there has been a generally upwards trend with 1,829 offences recorded in 2013/14, two offences less than for 2012/13.

**Table 2.2 Recorded crime by offence, 1998/99 to 2013/14<sup>1</sup>**

**Please note: Detailed notes to accompany this table are available on the following page.**

Although figures for the financial years 1999/00 through to 2002/03 are not shown in this table, they are available in the [accompanying excel spreadsheet](#)

## Notes to accompany Table 2.2

1. Between 1998/99 and 2000/01 crimes were recorded through a paper-based system where a completed form was forwarded to PSNI's Statistics Branch for input onto a stand-alone system, from which crime figures were then extracted. In April 2001 PSNI introduced electronic recording through an integrated crime information system (ICIS), resulting in more low level crime being captured than would have occurred through the previous crime recording process. This system remained in place until the end of 2006/07. In April 2007, the NICHE record management system was introduced within PSNI for crime recording, a product specifically designed for police services to record and manage occurrences. Further information on [administrative data sources](#) within PSNI can be obtained from the PSNI website.
2. Number of crimes recorded using the expanded offence coverage and revised Counting Rules which came into effect on 1 April 1998.
3. The National Crime Recording Standard was introduced in April 2002, although some forces adopted NCRS practices before the standard was formally introduced. Figures before and after that date are not directly comparable. The introduction of NCRS led to a rise in recording in 2002/03 and, particularly for violent crime, in the following years as forces continued to improve compliance with the new standard. Much of the impact of introducing NCRS was experienced by PSNI in 2001/02, through the introduction of an integrated crime information system (ICIS) within PSNI which improved the capture of low level crimes.
4. The number of murders in 1998/99 includes the 29 persons killed in the Omagh bomb which occurred on 15 August 1998. This incident also accounts for approximately 90% of all wounding with intent and wounding offences recorded in 1998/99.
5. Prior to April 2003, offences where the victim received minor injuries (e.g. bruising or minor abrasions) were recorded as assault without injury. Since April 2003 assaults with minor injuries have been recorded as assault occasioning actual bodily harm (AOABH). This accounts for the large increase in AOABH offences and the large fall in assault without injury offences between 2002/03 and 2003/04. The Home Office introduced this change for England & Wales a year earlier, in April 2002.
6. Prior to 2008/09 classification 4.4 Causing death by dangerous driving was the only classification of this nature. From 2008/09 onwards these offences are split across classifications 4.4, 4.6, 4.8 and 4.9.
7. In April 2008 the Home Office issued clarification to police forces on how to record offences of wounding with intent/GBH with intent for those assaults resulting in minor or no injury to a victim, but where the intent was to cause serious injury. This revised technical guidance was issued to ensure that these offences were recorded in a consistent manner by all police forces. The effect of this clarification was that some offences that would previously have been recorded as other types of assault are now recorded as GBH with intent. While the clarification was introduced in 2008/09, PSNI continued to experience the impact of this during 2009/10. The majority of police forces in England and Wales experienced similar increases in these offences as a result of this clarification.
8. The offence of aggravated vehicle taking was introduced in Northern Ireland in 2004.
9. The offence of obstructing police was removed from the notifiable offence list in April 2003.
10. The Sexual Offences (Northern Ireland) Order 2008 was introduced in February 2009 and has altered the definition and coverage of sexual offences.
11. Up to 2003/04 the offence of rape could only be committed against a female. However the Criminal Justice (Northern Ireland) Order 2003 redefined the offence so that buggery without consent would constitute an offence of rape (i.e. rape could then be committed against a male).
12. Offences classified as 17 Indecent assault on a male, 20 Indecent assault on a female, 21 Unlawful sexual intercourse with a girl under 14, 22 Unlawful sexual intercourse with a girl under 17, 74 Gross indecency with a child, 16 Buggery and 18 Gross indecency between males relate to legislation that existed prior to that introduced in February 2009. From April 2010 offences are no longer recorded using these classifications (see 13. below).
13. Under the Home Office Counting Rules, offences which were reported to the police between February 2009 and March 2010 but which were committed prior to February 2009 were recorded under the previous legislation wherever possible. However in April 2010 this guidance was changed so that historic allegations committed under previous legislation should be recorded and detected as if committed today.
14. Even though the Sexual Offences (Northern Ireland) Order 2008 was introduced in February 2009, Sections 57-59 of the Sexual Offences Act 2003 (trafficking for sexual exploitation) continue to apply.
15. Offences were originally implemented through the Sexual Offences Act 2003.
16. From 1st April 2002, a change in the Home Office Counting Rules meant that most attempted thefts/unauthorised taking of motor vehicles previously recorded in Theft or unauthorised taking of a motor vehicle are now recorded as Vehicle interference.
17. This classification contains explosives and petrol bombing offences for which information prior to 2007/08 is not available to allow classification to dwelling, building other than a dwelling, vehicle or other.
18. Cannabis was classified as a Class B drug until 29 January 2004 when it was reclassified to a Class C drug. Cannabis was then reclassified back to a Class B drug on 26 January 2009. The systems from which the crime figures were extracted did not record the type of Class B or Class C drug until the first cannabis reclassification took place. Therefore it is not possible to provide a complete data series separately identifying cannabis possession offences.
19. These offences were added to the data series in 2005/06.
20. The sub-classification of 'Other' includes offences such as affray, unlawful assembly and offences relating to incitement to hatred.
21. The reclassification exercise conducted during 2010/11 identified that, within Northern Ireland, offences of soliciting for the purposes of prostitution had not been identified as notifiable offences. This omission has been rectified and these offences are included in the recorded crime figures from April 2011.
22. New offences were introduced under the Fraud Act 2006 which came into force in January 2007.
23. These offences were added to the data series from 1st April 2003.
24. While the Offender Management Act offences which are included in the notifiable offence list do not extend to Northern Ireland, offences which do extend to Northern Ireland and are similar in nature are recorded in this classification.
25. These offences were added to the series from 1 April 2002.
26. In England & Wales offences such as fraud by false representation (deception) are reported to Action Fraud and from April 2013 these figures are no longer included in police recorded crime statistics. However in Northern Ireland these offences are still reported to the police and so continue to be included in the PSNI recorded crime statistics.
27. For offences of Fraud by false representation, counting changed from a per fraudulent transaction to a per account basis from January 2007. From 1st April 2007 these offences were reported to a single point of contact within each police force by financial institutions.

'..' in the table indicates that data are not available.

'-' indicates that for offences recorded, a percentage change is not reported because the base number of offences is less than 50.

**Table 2.3 Homicides, 1969 to 2013<sup>1,2</sup>**

1. Figures from 1969 to 1998 have been sourced from the Chief Constable's Annual Reports.

2. IRA ceasefires were declared in 1994 and 1997 and a Loyalist ceasefire was announced in 1994. In 1998 the Northern Ireland peace agreement was reached and the Real IRA announced a ceasefire.

3. Between 1969 and 1976 the figures for manslaughter and infanticide in the Chief Constable's Annual Reports were not provided separately.

4. Corporate manslaughter – Corporate Manslaughter and Corporate Homicide Act 2007 (came into force 6 April 2008)

1. Corporate manslaughter – Corporate Manslaughter and Corporate Homicide Act 2007 (came into force 6 April 2008)

2. The number of murders in 1998/99 includes the 29 persons killed in the Omagh bomb which occurred on 15 August 1998.

### 3 Knife and Sharp Instrument Crime

Since April 2007 the Home Office has collected additional data from police forces on offences involving knives and sharp instruments, where a sharp instrument is any object that pierces the skin (or in the case of a threat is capable of piercing the skin), e.g. a broken bottle. Knives and sharp instruments are taken to be involved in an incident if they are used to stab or cut, or as a threat. Offence coverage is for a group of selected offences, as detailed in tables 3.1 and 3.2 below. In England and Wales comparable data for these offences is available back to 2008/09. PSNI has compiled knife and sharp instrument data for each financial year since 2007/08 based on the definitions used by the Home Office.

**Please note:** the records used to provide the figures in tables 3.1 and 3.2 are identified from an operational crime recording system and, as such, may be subject to change where more up-to-date weapon information becomes available.

**Table 3.1 Selected violent and sexual offences recorded by the police involving knives or sharp instruments<sup>1</sup> by crime type in Northern Ireland, 2007/08 to 2013/14**

Selected crime type	Number of selected offences involving a knife or sharp instrument							Numbers
	2007/08	2008/09	2009/10	2010/11	2011/12	2012/13	2013/14	
Homicide <sup>2</sup>	5	8	7	8	7	7	3

1. A sharp instrument is any object that pierces the skin (or in the case of a threat, is capable of piercing the skin), eg a broken bottle. The knife and sharp instrument figures presented here are based on weapon details taken from a live operational system and are therefore subject to change.

2. Homicide includes murder, manslaughter and infanticide.

3. Includes 5D Assault with intent to cause serious harm and 8N Assault with injury.

4. Includes indecent assault on a male/female (classifications 17/20) and sexual assault on a male/female (classifications 17A/17B/20A/20B), as well as 19A-19H Rape.

## 4 Victims of Crime

The Home Office has identified offences as being victim-based, state-based or victim and state-based. State-based offences are those for which no member of the public or business/organisation is a victim. For victim-based offences, the victim can be a member of the public (referred to here as person victim), a police officer who was the victim of a crime in the course of carrying out their duty, or a business or organisation. Details on the availability of information relating to victim characteristics can be found in Section 4.5 of the [User Guide to Police Recorded Crime Statistics in Northern Ireland](#).

The introduction of the NICHE system in 2007/08 has enabled a breakdown of crime by the type of victim to be provided from this date. Each of the financial years since 2007/08 shows a similar picture. Figures for 2013/14 show that around 70 per cent of all crimes have a person victim, 3 per cent a police officer victim, 18 per cent a business/organisation victim and 9 per cent are state-based.

**Figure 4.1 Crimes recorded by type of victim, 2013/14**

There were 71,569 persons identified as victims of crime in 2013/14, 3,196 police officers and 18,885 businesses/organisations. There were 9,096 state-based offences recorded. The table below shows the main crime classifications split by victim type for 2013/14.

**Table 4.1 Percentage of each victim type recorded by type of crime, 2013/14**

	Person (%)	Police Officer (%)	Business / Organisation (%)	Percentages State (%)
<b>VICTIM-BASED CRIME</b>				
Violence against the person	90	10	0	0
Sexual offences	98	2	0	0
Robbery	75	0	25	0
Theft offences - burglary	74	0	26	0
Theft offences	63	0	37	0
Criminal damage	73	0	27	0
<b>OTHER CRIMES AGAINST SOCIETY</b>				
Drug offences	0	0	0	100
Possession of weapons offences	0	0	0	100
Public order offences	0	0	0	100
Miscellaneous crimes against society <sup>1</sup>	16	0	2	82
Other fraud	50	0	50	0
<b>Total recorded crime – all offences</b>	<b>70</b>	<b>3</b>	<b>18</b>	<b>9</b>

<sup>1</sup> While the majority of miscellaneous crimes against society are state-based, there are a few which can have a person or business victim, mostly offences relating to Classification 59 Threat or possession with intent to commit criminal damage.

Details relating to the age of the victim at the time the offence was committed are also available dating back to 2007/08 for all relevant crime types and for person victims (police officer victims are not included in these figures). A more detailed breakdown of victim age is available in the [excel spreadsheets](#) which accompany this bulletin, through pivot tables which allow manipulation of data by age band, crime type and financial year.

## 4.1 Age profile 2013/14: age of victim

There were 71,569 offences recorded in 2013/14 where there was a person victim. Nine per cent of this total were persons aged under 18 (6,497 offences), 84 per cent were aged 18-64 and 7 per cent were aged 65 or over. Age information was unavailable for less than 1 per cent of all person victims.

**Victim aged under 18:** Sixty five per cent of those victims who were under 18 at the time the offence occurred were victims of violence against the person offences, 21 per cent were victims of sexual offences, 13 per cent were victims of theft offences (including burglary) and criminal damage, and 1 per cent were robbery victims.

**Crime rates victim aged under 18:** There were 15 crime victims under the age of 18 per 1,000 of the population under 18. The rate per 1,000 of the under 18 population for violence against the person was 10, while the rate for sexual offences was 3.

**Victim aged 18-64:** Forty per cent of victims aged between 18 and 64 were victims of violence against the person offences, 22 per cent were victims of criminal damage, 24 per cent were victims of theft offences and 9 per cent were victims of burglary. Just over 1 per cent were victims of a sexual offence.

**Crime rates victim aged 18-64:** There were 54 crime victims aged 18-64 per 1,000 of the population aged 18-64. The rate per 1,000 of the population aged 18-64 for theft (including burglary) and criminal damage was 30, was 22 for violence against the person, was less than 1 for sexual offences and less than 1 for robbery.

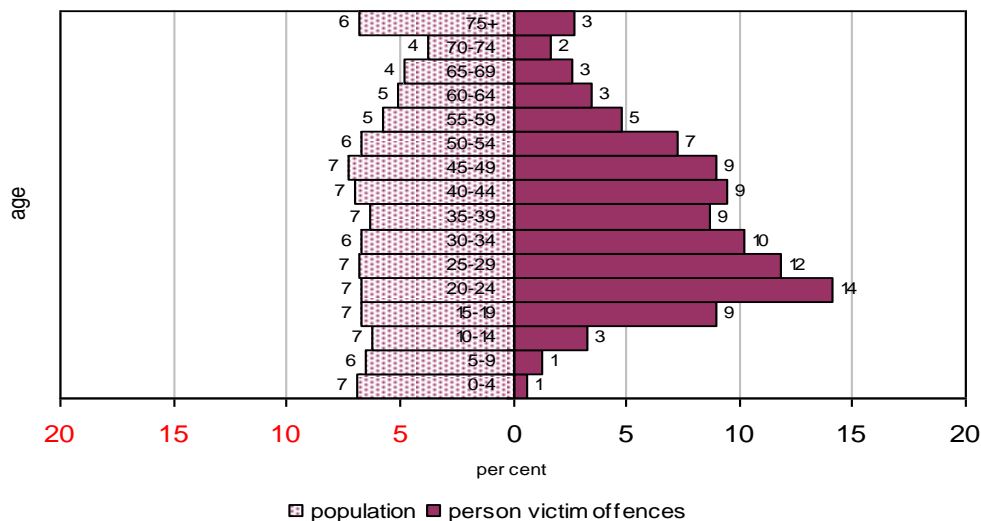

**Victim aged 65+:** Thirty two per cent of victims aged 65 or over were victims of theft, 26 per cent were victims of criminal damage, 24 per cent were victims of burglary and 13 per cent were victims of violence against the person offences.

**Crime rates victim aged 65+:** There were 18 crime victims aged 65 or over per 1,000 of the population aged 65+. The rate per 1,000 of the 65+ population for theft (including burglary) and criminal damage was 14, while the rate for violence against the person offences was 2.

**Figure 4.2 Percentage of victims by age band in each main crime type, 2013/14**

**Figure 4.3 Age profile of crime victims compared with Northern Ireland population profile, 2013/14**

## 4.2 Age profile 2013/14: type of crime

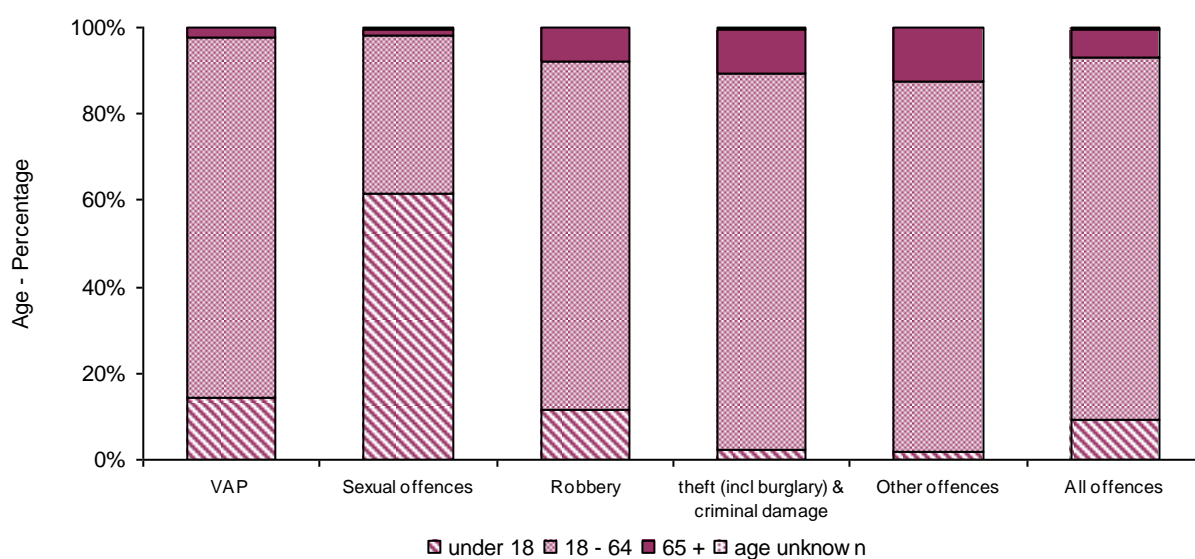

**Violence against the person:** The majority of victims were in the 18-64 age group (83 per cent), with 15 per cent aged under 18 and 2 per cent aged 65+. The age of the victim was unknown in less than 1 per cent of cases.

**Sexual offences:** Sixty one per cent of victims were under 18 at the time the offence occurred, while 37 per cent were between the ages of 18 and 64. One per cent were aged 65 or above.

**Robbery:** Four out of five victims were aged 18-64 (81 per cent), with 11 per cent aged under 18 and 8 per cent aged 65+. The age of the victim was unknown in less than 1 per cent of cases.

**Theft offences (including burglary) and criminal damage:** Eighty seven per cent of victims were aged 18-64, with 11 per cent aged 65 or above and 2 per cent aged under 18. In less than 1 per cent of cases the age of the victim was unknown.

**Figure 4.4 Proportion of crime victims by age band for the main crime types, 2013/14**

## 5 Outcomes

This section of the bulletin looks at the levels and trends in outcomes and outcome rates in Northern Ireland. There have been a number of changes to the rules governing what can be counted as an outcome since 1998/99. Section 2.4 of the [User Guide to Police Recorded Crime Statistics in Northern Ireland](#) describes in detail what outcomes are, the recording practice in relation to outcomes and changes to this practice that have affected the recording of outcomes and outcome rates.

Prior to April 2013 these figures were mainly presented in the form of sanction detections and sanction detection rates. These included the outcome methods of charge/summons, cautions (adult and juvenile), penalty notices for disorder and offences taken into consideration. The sanction detections and sanction detection rates did not include discretionary disposals or indictable only offences where no action was taken against the offender.

For this reason, most outcome figures in this bulletin are shown dating back to 2007/08 in order to provide a data series that is as comparable as possible, bearing in mind that discretionary disposals were first introduced as an outcome method during 2011/12, with penalty notices for disorder introduced in June 2012.

Outcome rates refer to the number of outcomes recorded in a given year expressed as a percentage of the total number of crimes recorded in the same period. This is not a clear-cut measure of police investigative performance and needs to be interpreted with care. For example, some of the offences with the highest outcome rates are the offences most influenced, in terms of their recorded numbers, by proactive policing to apprehend offenders (e.g. drug offences and many of the offences in the 'other offences' category).

### 5.1 Comparison of outcome rates, 2012/13 and 2013/14

There were 102,746 offences recorded in 2013/14 and 27,975 offences detected giving an outcome rate of 27.2%. In 2012/13 there were 29,638 offences detected, with an outcome rate of 29.5%. The number of outcomes fell by 1,663 between 2012/13 and 2013/14 while the number of offences recorded increased by 2,357 resulting in a fall in the outcome rate of 2.3 percentage points.

**Figure 5.1 Percentage point change in the main recorded crime type outcome rates, 2013/14 compared with 2012/13**

**Outcome rates by offence group:** Between 2012/13 and 2013/14 none of the main crime classifications showed an increase in their outcome rate. The smallest decreases were 0.4 percentage points in sexual offences and 0.6 percentage points in criminal damage. The largest drop in outcome rate was experienced in other crimes against society (-6.5 percentage points).

**Outcomes by method of outcome:** The outcome rate in respect of charge/summons fell from 22.5% in 2012/13 to 20.7% in 2013/14. The adult caution rate fell slightly from 2.5% to 2.3% and the juvenile caution rate also fell slightly from 1.0% to 0.8%. The rate for discretionary disposals fell from 3.1% to 2.6%. Only

penalty notices for disorder showed an increase from 0.4% in 2012/13 to 0.8% in 2013/14, part of which may be explained by the fact they were only introduced in June 2012 and so the rate for 2012/13 did not cover a full twelve month period.

**Table 5.1 Crime outcomes by crime type and method of disposal, 2013/14**

	Total recorded crime	Charge/summons	Cautions	Discretionary disposals	Penalty Notice for Disorder	TIC	Numbers and percentages

## 5.2 Trends in outcome rates over time

Figure 5.2 shows the trend in the overall outcome rate since 1998/99. Northern Ireland experienced a drop in the overall outcome rate of 7 percentage points between 2000/01 and 2001/02, most likely influenced by the introduction of the ICIS system within PSNI. This system improved the capture of low level crimes such as criminal damage which tend to be harder to detect.

In April 2006, a higher evidential standard was adopted within the PSNI following the establishment of the Public Prosecution Service in Northern Ireland. This resulted in a fall in the overall outcome rate, from 30.6% in 2005/06 to 23.6% in 2006/07.

From April 2007 some of the methods allowed for claiming outcomes that did not result in a sanction against the offender were discontinued altogether, and the overall outcome rate within Northern Ireland fell further, from 23.6% in 2006/07 to 20.5% in 2007/08.

The outcome rate then rose each year from 2008/09 to 2012/13 when it reached 29.5%, before falling by 2.3 percentage points to 27.2% in 2013/14. However it should be remembered that discretionary disposals were included as an outcome method from 2011/12 and penalty notices for disorder were introduced in June 2012, both of which will have had an impact on the increase in outcome rate in 2011/12 and 2012/13.

**Figure 5.2 Outcome rates, 1998/99 to 2013/14**

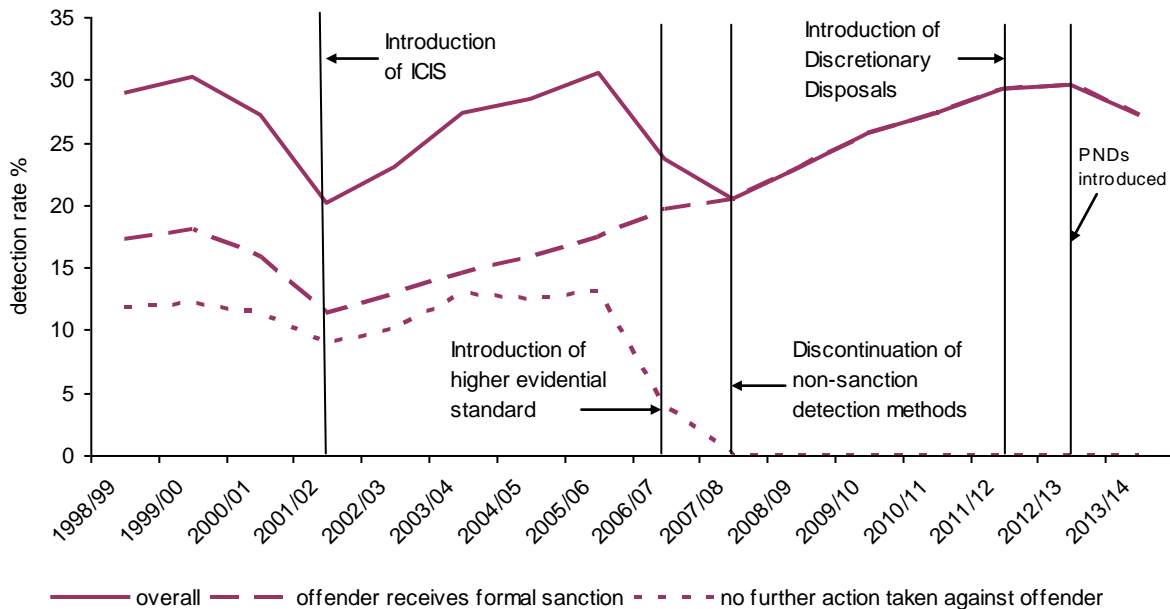

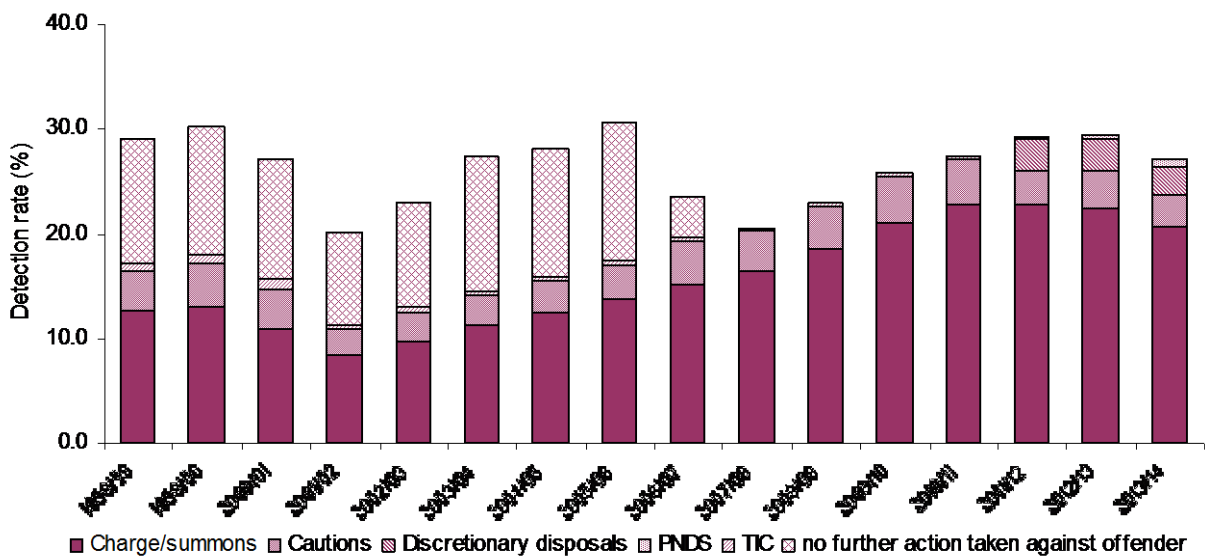

Figure 5.3 illustrates the move away from the use of those outcomes not resulting in a sanction against the offender, following the introduction of the higher evidential standard in 2006/07 and the limited use of outcome methods where no action was taken against the offender from 2007/08. The increase in the use of charge / summons as an outcome method can also clearly be seen.

**Figure 5.3 Outcome rates by method of disposal, 1998/99 to 2013/14**

The charge/summons outcome rate was at its lowest level in 2001/02 (8.4%) before increasing year on year since to a rate of 22.9% in 2011/12. The charge/summons outcome rate has since fallen to 22.5% in 2012/13 and to 20.7% in 2013/14. The outcome rate for adult cautions was at its lowest level in 2001/02 (1.5%) and then generally increased to a rate of 2.9% in 2010/11; the rate for 2013/14 is 2.3%. The outcome rate for juvenile cautions has fluctuated between 0.8% (recorded in 2013/14) and 2.1% (recorded in 2006/07). Adult and juvenile cautions accounted for 19 per cent of all outcomes in 2007/08, this proportion has since

decreased and currently stands at 11 per cent. The TIC outcome rate reached 1% in 2000/01 but has been less than 1% in all other years. Penalty notices for disorder, which were introduced in June 2012, had an outcome rate of 0.4% in 2012/13 and 0.8% in 2013/14.

**Trends in outcome rates by offence group:** While the main crime types of robbery, vehicle offences and public order offences achieved their highest outcome rates during 2012/13, each showed a fall between 2012/13 and 2013/14; robbery fell from 21.3% to 16.5% (the second lowest rate since 2007/08), vehicle offences from 20.6% to 16.7% and public order offences from 64.5% to 55.0% (the lowest rate since 2007/08).

The outcome rate for violence with injury increased year on year from 28.2% in 2007/08 and reached a peak of 37.0% in 2010/11; the outcome rate has since fallen year on year to 32.9% in 2013/14. Violence without injury shows a similar trend, increasing year on year from 27.3% in 2007/08 to 40.7% in 2011/12 before falling to 29.4% in 2013/14.

The outcome rate for rape offences was at its highest point in 2008/09 (21.0%) and at its lowest point the following year (12.8%). The outcome rate then increased to 18.1% in 2011/12 and currently stands at 16.5% in 2013/14. The outcome rate for other sexual offences increased year on year from 17.9% in 2007/08 to 30.5% in 2011/12 before falling to 22.1% in 2013/14.

The outcome rate for overall burglary was at its highest in 2011/12 (12.8%) and has since fallen to 10.5% in 2013/14; only 2007/08 was lower with an outcome rate of 10.4%. Since 2007/08 the domestic burglary outcome rate was at its highest in 2011/12 (12.1%) while the lowest outcome rate of 9.7% was experienced in both 2010/11 and 2013/14. The outcome rate for non-domestic burglary was 10.9% in 2007/08 and reached 13.9% in 2011/12; the outcome rate has since fallen to 12.1%.

The outcome rate for theft offences (including burglary) showed a general increase from a level of 15.1% in 2007/08 to reach 20.8% in 2012/13. The current level in 2013/14 has fallen to 19.6%. Criminal damage offences had an outcome rate of 9.5% in 2007/08 and increased year on year to 16.2% in 2012/13 before falling to 15.6% in 2013/14.

**Table 5.2 Recorded crime outcome rates by offence, 2007/08 to 2013/14<sup>1,2</sup>**

Please note: Detailed notes to accompany this table are available on the following page.

## Notes to accompany Table 5.2

1. Between 1998/99 and 2000/01 crimes were recorded through a paper-based system where a completed form was forwarded to PSNI's Statistics Branch for input onto a stand-alone system, from which crime figures were then extracted. In April 2001 PSNI introduced electronic recording through an integrated crime information system (ICIS), resulting in more low level crime being captured than would have occurred through the previous crime recording process. This system remained in place until the end of 2006/07. In April 2007, the NICHE record management system was introduced for crime recording, a product specifically designed for police services to record and manage occurrences. Further information on the [administrative data sources](#) within PSNI can be obtained from the PSNI website.
2. The outcome figures provided in this table are based on the following outcome methods; charge/summons, cautions (adult and juvenile), discretionary disposals, penalty notices for disorder, offences taken into consideration and indictable only offences where no action was taken against the offender (died before proceedings or PPS did not prosecute). There have been a number of changes to the rules governing what can be counted as an outcome since 1998/99, an explanation of which can be found in the User Guide to Police Recorded Crime Statistics in Northern Ireland. For this reason figures are shown dating back to 2007/08 in order to provide a data series that is as comparable as possible, bearing in mind that discretionary disposals were first introduced as an outcome method during 2011/12 and penalty notices for disorder were introduced in June 2012.  
Offences detected in any particular year may have been initially recorded in an earlier year and for this reason some percentages may exceed 100.  
The outcome rate is the number of crimes that are cleared up divided by the total number of recorded offences.
3. Percentage point change is based on unrounded figures.
4. Prior to 2008/09 classification 4.4 Causing death by dangerous driving was the only classification of this nature. From 2008/09 onwards these offences are split across classifications 4.4, 4.6, 4.8 and 4.9.
5. The offence of obstructing police was removed from the notifiable offence list in April 2003.
6. The Sexual Offences (Northern Ireland) Order 2008 was introduced in February 2009 and has altered the definition and coverage of sexual offences.
7. Offences classified as 17 Indecent assault on a male, 20 Indecent assault on a female, 21 Unlawful sexual intercourse with a girl under 14, 22 Unlawful sexual intercourse with a girl under 17, 74 Gross indecency with a child, 16 Buggery and 18 Gross indecency between males relate to legislation that existed prior to that introduced in February 2009. From April 2010 offences are no longer recorded using these classifications (see 12. below).
8. Under the Home Office Counting Rules, offences which were reported to the police between February 2009 and March 2010 but which were committed prior to February 2009 were recorded under the previous legislation wherever possible. However in April 2010 this guidance was changed so that historic allegations committed under previous legislation should be recorded and detected as if committed today. Please note that for an offence recorded under the previous legislation but detected from 1st April 2010 the detection will be recorded against the previous legislation, although no detection rate will be calculated as no offences will have been recorded.
9. Even though the Sexual Offences (Northern Ireland) Order 2008 was introduced in February 2009, Sections 57-59 of the Sexual Offences Act 2003 (trafficking for sexual exploitation) continue to apply.
10. Offences were originally implemented through the Sexual Offences Act 2003.
11. This classification contains explosives and petrol bombing offences for which information prior to 2007/08 is not available to classify to dwelling, building other than a dwelling, vehicle or other. Please note that offences of this nature recorded up to 2006/07 but detected after 2006/07 will be included in this classification, although no detection rate will be calculated as no offences will have been recorded.
12. Cannabis was classified as a Class B drug until 29 January 2004 when it was reclassified to a Class C drug. Cannabis was then reclassified back to a Class B drug on 26 January 2009. The systems from which the crime figures were extracted did not record the type of Class B or Class C drug until the first cannabis reclassification took place. Therefore it is not possible to provide a complete data series separately identifying cannabis possession offences. Please note that offences of this nature recorded up to 2003/04 but detected after 2003/04 will be included in this classification, although no detection rate will be calculated as no offences will have been recorded.
13. The sub-classification of 'Other' includes offences such as affray, unlawful assembly and offences relating to incitement to hatred.
14. The reclassification exercise conducted during 2010/11 identified that, within Northern Ireland, offences of soliciting for the purposes of prostitution had not been identified as notifiable offences. This omission has been rectified and these offences are included in the recorded crime figures from April 2011.
15. While the Offender Management Act offences which are included in the notifiable offence list do not extend to Northern Ireland, offences which do extend to Northern Ireland and are similar in nature are recorded in this classification.
16. In England & Wales offences such as fraud by false representation (deception) are reported to Action Fraud and from April 2013 these figures are no longer included in police recorded crime statistics. However in Northern Ireland these offences are still reported to the police and so continue to be included in the PSNI recorded crime statistics.

'.' in the table indicates that data are not available.

'-' indicates that for offences detected, a detection rate cannot be calculated as there were no offences recorded.

**Table 5.3 Recorded crime outcomes and outcome rates by method of disposal, 1998/99 to 2013/14**

Method of disposal	1998/99	2003/04	2004/05	2005/06	2006/07	2007/08	2008/09	2009/10	2010/11	2011/12	2012/13	2013/14

<b>All outcomes</b>	<b>29.0</b>	<b>27.4</b>	<b>28.2</b>	<b>30.6</b>	<b>23.6</b>	<b>20.5</b>	<b>23.0</b>	<b>25.8</b>	<b>27.3</b>	<b>29.2</b>	<b>29.5</b>	<b>27.2</b>

1. Adult cautions include adult cautions and adult informed warnings.

2. Juvenile cautions include juvenile restorative cautions, juvenile informed warnings and juvenile prosecutorial diversions.

3. Discretionary disposals were introduced as an outcome during 2011/12.

4. Penalty notices for disorder were introduced within Northern Ireland in June 2012.

5. Offences asked to be taken into consideration at court.

6. From 1 April 2007, new rules governing non-sanction detections significantly limited the occasions for which such administrative disposals can be applied.

7. From 1 April 2007 these methods can only be claimed as an outcome for 'indictable-only' offences (those offences which must be tried in a Crown Court) where the Public Prosecution Service is satisfied that there is enough evidence to prosecute.

8. From 1 April 2007 these methods can no longer be claimed as an outcome.

9. Total recorded crime whether detected or not.

10. The number of crimes that are cleared up expressed as a percentage of the total number of recorded offences.

'..' in the table indicates that data are not available.

Although figures for the financial years 1999/00 through to 2002/03 are not shown in this table, they are available in the [accompanying excel spreadsheet](#)

## 6 Geographic Patterns of Crime

As a general rule crimes are geographically recorded by the police based on the location in which the incident occurred. This section provides details on recorded crime, sanction detection rates and population rates for each policing district and policing area within Northern Ireland.

The policing areas are based on the local government district boundaries for Northern Ireland, with Belfast being split into East, North, South and West. Policing areas have then been grouped together to form the eight policing districts as shown in Figure 6.1. The tables in this section group the policing areas within each district.

While the policing boundaries described in this section have changed since those in place in 1998/99, postcode information has been used to create a comprehensive data series based on the current boundaries.

Care should be taken when comparing crime rates at policing district and policing area level as some of the differences between areas may reflect variations in the composition of those areas, such as the degree of urbanisation, level of deprivation and the balance between the resident population, day-time population and night-time economy. Where there is an increased day-time population or night-time economy relative to the resident population, the number of crimes relative to the real population of potential victims may be over-represented.

While the tables in this report provide policing district and policing area figures at overall crime level, figures are available by crime type from pivot tables contained within the [spreadsheet](#) which accompanies this report.

Additional geographic breakdowns of crime, such as by ward and parliamentary constituency, are available on the [Northern Ireland Neighbourhood Information Service](#) (NINIS) Internet site.

Provisional management information drawn from police recorded crime figures, published at street level each month, is available through the [police crime mapping website](#). The figures on the crime mapping website will differ from those provided in this bulletin as they have been extracted from the police administrative system on different dates, and also require a grid reference in order to be mapped.

Further details on the geographic recording of crime in Northern Ireland can be found in Section 7 of the [User Guide to Police Recorded Crime Statistics in Northern Ireland](#).

1. Between 1998/99 and 2000/01 crimes were recorded through a paper-based system where a completed form was forwarded to the PSNI Statistics Branch for input onto a stand-alone system, from which crime figures were then extracted. In April 2001 PSNI introduced electronic recording through an integrated crime information system (ICIS), resulting in more low level crime being captured than would have occurred through the previous crime recording process. This system remained in place until the end of 2006/07. In April 2007, the NICHE record management system was introduced for crime recording, a product specifically designed for police services to record and manage occurrences. Further information on the [administrative data sources](#) within PSNI can be obtained from the PSNI website.

2. Crimes are geographically recorded by the police based on the location in which the incident occurred.

3. The National Crime Recording Standard was introduced in April 2002, although some forces adopted NCRS practices before the standard was formally introduced. Figures before and after that date are not directly comparable. The introduction of NCRS led to a rise in recording in 2002/03 and, particularly for violent crime, in the following years as forces continued to improve compliance with the new standard. Much of the impact of introducing NCRS was experienced by PSNI in 2001/02, through the introduction of an integrated crime information system (ICIS) within PSNI which improved the capture of low level crimes.

Although figures for the financial years 1999/00 through to 2002/03 are not shown in this table, they are available in the [accompanying excel spreadsheet](#)

1. The outcome figures provided in this table are based on the following outcome methods; charge/summons, cautions (adult and juvenile), discretionary disposals, penalty notices for disorder, offences taken into consideration and indictable only offences where no action was taken against the offender (died before proceedings or PPS did not prosecute). There have been a number of changes to the rules governing what can be counted as an outcome since 1998/99, an explanation of which can be found in the User Guide to Police Recorded Crime Statistics in Northern Ireland. For this reason figures are shown dating back to 2007/08 in order to provide a data series that is as comparable as possible, bearing in mind that discretionary disposals were first introduced as an outcome method during 2011/12 and penalty notices for disorder were introduced in June 2012.

Offences detected in any particular year may have been initially recorded in an earlier year and for this reason some percentages may exceed 100.

The outcome rate is the number of crimes that are cleared up divided by the total number of recorded crimes.

2. Percentage point change is based on unrounded figures.

Although figures for 1999/00, 2000/01 and 2001/02 are not shown in this table, they are available in the [accompanying excel spreadsheet](#)

1. Crimes are geographically recorded by the police based on the location in which the incident occurred.

2. Crime rates are calculated using the Northern Ireland mid-year population estimates. These estimates can also be obtained from the Northern Ireland Statistics and Research Agency Internet site: <http://www.nisra.gov.uk/demography/default.asp17.htm>. Mid-year population estimates for 2001 to 2011 have been revised to take into account the 2011 Census results. Revisions at the Northern Ireland level were published on 30<sup>th</sup> April 2013, while revisions for the sub-national population estimates were published on 26<sup>th</sup> June 2013.

Crime figures for England & Wales are available from the [Office for National Statistics](http://www.ons.gov.uk) Internet site. Further information and links to UK and International crime statistics can be found in Section 8 of the [User Guide to Police Recorded Crime Statistics in Northern Ireland](#).

Although figures for 1999/00, 2000/01 and 2001/02 are not shown in this table, they are available in the [accompanying excel spreadsheet](#)
